

Chiropractic Clinic Offers Free Evaluation For Auto Injury Treatment In Stockton CA

January 30, 2018

January 30, 2018 - PRESSADVANTAGE -

Family Chiropractic Wellness Center has announced that they now offer auto injury care in Stockton CA. The clinic also announced that they now offer a free evaluation, which is completely no obligation as well. The treatment they offer is manual therapy, which has been shown to be highly beneficial in reducing pain after vehicular accidents. Dr. Rick Bonar wants people to know that the injuries they have sustained from an auto accident can be treated in a safe and drug free manner.

Dr. Bonar from Family Chiropractic Wellness Center, says: "When a person has been in an auto accident, their joints, due to injury, could lack sufficient movement and range of motion. This, in turn, can lead to pain, discomfort and an interruption in function, movement and posture. Through manual therapy, we help to increase range of motion, reduce soft tissue inflammation, regulate pain, relax, heal tissue, and essential restore physical function."

Dr. Bonar is widely accepted as the best chiropractor in Stockton CA. This is evident from his many positive reviews, including from clients who have previously consulted with a different chiropractor. Kate S., for instance, says: "I've had 6 visits with Dr. Bonar and he is never rough and never uses force. His adjustments

are exact and when I leave I feel so alive and not stiff or off like I have with other chiropractors. What I like the most about going to see Dr. B is that he really takes his time to adjust you and he knows what your body really needs for proper correction."

People who have had auto accidents, or who suffer from any other form of pain condition, are encouraged to contact Family Chiropractic Wellness Center as soon as possible to arrange the free, no obligation evaluation. During this evaluation, Dr. Bonar can explain how chiropractic care works and whether it is suitable to the problems they are experiencing. He explains: "If there is a good fit, we can customize a plan of chiropractic care for your condition and health goals."

The clinic's goal is to help people achieve full and total wellness, living a life that is free from pain. Manual therapy can help people achieve that.
