

Perfect Nail Solution Releases New Information on Nail Avulsions as a Treatment for Toenail Infections

January 30, 2018

January 30, 2018 - PRESSADVANTAGE -

Irwindale, California: Perfect Nail Solutions, a company that specializes in creating natural formulas for fighting fingernail infections has highlighted the efficacy of surgical nail removals as an option for treating severe instances of toenail and fingernail infections.

According to Allen Farrar, "As a part of our nail health awareness program, we are highlighting the various treatments that are available for treating nail onychomycosis. Essential oils such as tea tree oil, lemon oil along with Vitamin E are a great remedy for nail fungus. But, in cases wherein the symptoms are severe, the disease may necessitate medical intervention in the form of oral treatment as well as nail removal surgeries."

The surgery, known as nail avulsion, is a common surgery for the nail unit which consists of the excision of the body of the nail plate from its primary attachments, the nail bed ventrally and the PNF dorsally. It can be done in a clinic or doctor's office wherein either the diseased section or the entire nail is removed from the nail bed.

To prevent any occurrence of a future infection, especially since onychomycosis is a chronic infection, the

doctor can also destroy the nail matrix entirely. Post surgery care includes cleaning the treated area with warm water twice a day along with covering the area with petroleum jelly and covering it with a band-aid. Care should be taken to refresh the petroleum jelly up to thrice a day.

The wounds caused by the surgery can heal back in a couple of weeks, with fingernails growing back within 6 months and toenails taking 12 to 18 months to grow back. Nail onychomycosis can be a severe condition but it is often more of a cosmetic problem rather than a problematic one. It can give rise to unpleasant symptoms such as nail deformity, yellow and green nails, a white buildup under the nail bed along with inflammation as well as pain.

Perfect Nail Solution has devised its unique two-step formula that uses the power of natural ingredients to act as a toenail discoloration treatment. This anti-fungal treatment may take care of the symptoms and make sure that the nails look clean and disease free.
