

Cruvina Announces That Their Shatterproof Plastic Wine Glasses Are Safe To Use Around Pets

February 06, 2018

February 06, 2018 - PRESSADVANTAGE -

Cruvina, providers of shatterproof plastic glassware, announces that their stemless wine glasses are safe to be used around pets.

Erin Moore, Co-Founder of Cruvina, shares "We love our dogs. They are part of the family and participate in all of our family gatherings. So when we are serving wine, we want to do so in vessels that are not only beautiful, but safe."

Cruvina wine glasses meet both of those requirements. They are made from Tritan plastic by Eastman. This plastic has been molded into a beautiful shape that fits nicely into the hand. It is crystal clear and looks like "real" glass. And just like "real" glass, these plastic glasses are both scratch-resistant and odor-resistant. Also, the glasses have a stemless design, so that they sit firmly on any hard surface. And they have a comfortable, spill-proof rim. With all of these features, the wine glasses provide an aesthetic wine drinking experience.

And since Tritan plastic is virtually shatterproof, the glasses are safe to use as well. Even if they do fall, they won't break so there is no worry about a beloved pet getting accidentally cut on shards of broken glass.

Customers have been very pleased with this aspect of the glasses. Here is what one had to say:

"These are great glasses! They look like glass but they are amazingly durable and unbreakable. They are perfect to use out at the pool and also with a large dog that doesn't seem to know the whereabouts of his wagging tail and has a tendency to knock things over."

Each box comes with four 13-ounce glasses. Cruvina wine glasses are available on Amazon and come with a 30-day money-back guarantee.
