

Chiropractic Care In Tiffin Iowa Now Offers Total Family Care

February 19, 2018

February 19, 2018 - PRESSADVANTAGE -

Chiropractic at Tiffin Family Care, based in Tiffin, IA, is proud to announce that they now offer total family care. The Tiffin chiropractor believes in offering integrated medicine, including not just chiropractic care but also counseling and other medical services. The clinic offers these services across all the age ranges.

Dr. Angela Overman from Chiropractic at Tiffin Family Care says: "Our clinic is an integrated medicine clinic in Tiffin, Iowa that opened in June 2016. We offer medical services, chiropractic care, and counseling services giving our patients access to different types of treatment all in one place to achieve the best possible health outcomes for each individual patient."

One of the reasons why the clinic has decided to offer holistic, integrative care, is because the physical and mental health aspects are so closely linked. Someone who experiences chronic pain, for instance, often also experiences a great deal of anxiety. This anxiety, in turn, can exacerbate the chronic pain. The clinic gained an increased understanding of this after working with multiple car accident injuries, which clearly showed people had both physical injuries and mental ones, leading to fear and anxiety.

Since then, Dr. Overman quickly became known as the best auto injury chiropractor Tiffin IA has to offer. She explains: "I have helped countless people recover from injuries suffered during a crash, and helped prevent the development of long-term symptoms. Chiropractic care is believed to be the perfect approach to dealing with auto injury pain. The most common types of problems experienced after a crash are those that originate in the neck and spine, the exact area of the body that chiropractic care excels at healing."

Angela Overman D.C. is also very active on Facebook, where she hopes to connect with more of her patients and their families. Her aim is to build a community of healthy individuals, who can receive and benefit from all the supportive care they provide. Research has shown time and again that early treatment is vital for speedy recovery, so she encourages everyone to contact her clinic as soon as possible should they suffer from any kind of pain or misalignment.
