

Dermatologist In Newport Beach Now Offers Medical And Cosmetic Botox

February 15, 2018

February 15, 2018 - PRESSADVANTAGE -

Dr. Stefani Kappel MD, a dermatologist based in Newport Beach, CA, is proud to announce that she now offers Botox for both medical and cosmetic purposes. While Botox is known mainly for its anti-aging capabilities, it was originally developed for its medicinal benefits. Dr. Kappel is one of the few professionals who still regularly use it for this.

She says: "Botox is used effectively to treat an extensive variety of medical conditions. These include excessive sweating, migraines, an overactive bladder, lazy eyes, and a range of neurological conditions. I am happy to provide people suffering from those conditions with Botox treatment if they are referred by their physician. Naturally, I also offer cosmetic Botox."

Cosmetic Botox is very popular and the main reason why people make an appointment with Stefani Kappel MD. She offers the treatment not just for those who want to soften the wrinkles they already have, but also for those who wish to prevent wrinkles from happening in the first place. Furthermore, she offers Botox not just for forehead wrinkles, but for a variety of other cosmetic reasons as well. She adds: "In addition to treating, preventing and softening of facial wrinkles, botox can also be used to smooth out a dimpled chin, sharpen the

jawline, sculpt the sides of the face for a more feminine contour, tighten loose neck bands, soften lip lines and upturn the angles of the mouth for a more youthful look."

Dr. Kappel's clients have been overwhelmingly happy with the results of their treatment. Mia R., for instance, says on Yelp: "Dr. Kappel is my girl. She's the one who I trust and have been seeing for a long time. Any one who's looking for a caring, knowledgeable dermatologist who knows more than enough should go and consult with her. Thank you Dr. Kappel."

Those looking to have Botox treatment, for whatever reason, are encouraged to contact Dr. Kappel as soon as possible directly or through her website at <http://stefanikappelmd.com>. They can also book a free, no obligation initial consultation, enabling Dr. Kappel to determine what type of treatment would be most appropriate.
