

Pensacola Chimney Cleaning Service Gives Advice For Effective Spring Cleaning

March 02, 2018

March 02, 2018 - PRESSADVANTAGE -

Pensacola, Fla. - Springtime is almost here and that means so it is time to start that annual spring cleaning. Doodlebuggers Service Network, a leading Pensacola chimney cleaning service company, is here to give people advice on how to have effective spring cleaning methods this year.

There are different areas a homeowner should hit during their spring cleaning. It always is good to clean out the refrigerator with a combination of salt and soda water to get rid of grime that is backed up in the fridge. Always make sure to clean windows and drapes to get rid of any dust that is on them. Air vent is important to reach so that air is filtered properly.

Doodlebuggers Service Network owner Tonia LaMontagne said, "Keeping homes clean is something everyone should take pride in. Spring cleaning can help homeowners get rid of anything that can cause health issues due to an unclean home."

When it comes to the home, the Pensacola mold restoration company suggests an important thing to know is that mold has a big effect on one's health. Mold is something that will be found during spring cleaning, it is

important that once people find the mold that they fix the issue right away. Some people have serious allergies to mold and it can cause severe reactions once it is exposed to the air. To keep it clean, make sure to dust the entire house and throw away all garbage. Clean and dust cabinets and corners where dirt and grime tend to build up. Infants, children, and the elderly are at the most risk for health concerns when it comes to mold exposure.

"Spring cleaning is more important than most people think," LaMontagne said. "We want everyone to stay happy and healthy in their homes."
