Amazing.com Reveals $750k Success Story for How to Start Selling on Amazon as CBS Reveals Amazon Currently Holds 7,096 U.S. Patents to Stay Ahead of Marketplace Competition

March 05, 2018

March 05, 2018 -

Amazing.com released an inspiring and informative Amazon seller success story in a video interview with single-mom Tiffany Estey. Beginning as someone barely able to make ends meet, Tiffany has transformed herself into the owner of a $750k Amazon business through utilizing the proven Amazon course?Amazing Selling Machine (ASM). She shares her story and tips on how to start selling on Amazon, using amazon sponsored ads, structuring her business, schedule, and success to meet personal goals. The same week Tiffany?s transformative story of mother turned successful Amazon business owner was released, CBS News released Amazon?s 7,096 ways of staying ahead of their competitors.

CBS News reported Amazon, the world?s biggest e-commerce company, currently holds 7,096 U.S. patents, under Amazon Technologies and Amazon.com. It is said that Amazon?s patents and R&D spending distinguish the company almost like a technology firm rather than a retailer. These patents run the technology behind everything from the one-clicking buying that is essential to the e-commerce platform to Alexa, the

company?s artificial intelligence powered voice assistant. Amazon maintains its competitive edge through their exclusive right to specific innovations.

In Amazing.com?s interview with the single-mom turned successful Amazon business owner, Tiffany Estey explains how she overcame being a struggling pregnant single mother to an Amazon business owner who is able to stay at home with her children and pay the bills. In the video, she shares how she used techniques she learned from the Amazing Selling Machine (ASM) training course to get started, build a brand, use pay-per-clicks, and focus on her goals. Tiffany even mentions extending the tips she learned from ASM into her personal life, using them to grow her YouTube channel to 40k followers and helping her to grow her health and fitness brand.

In 1994, Jeff Bezos founded Amazon. The once small online bookstore, operating out of Bezos? garage, has now transformed into a multi-billion-dollar company. Amazon?s offerings include household goods, clothing, snacks, apps, music, movies, TV shows and more. Amazon?s capabilities and products continuously expand due to their commitment to research and development spending and investment in innovative patents.

The Amazing Selling Machine (ASM) training course guides up and coming Amazon Sellers through the steps it takes to create a successful and thriving Amazon business. The course, provided through Amazing.com, starts at the beginning and walks sellers through the phases of setting up a private label Amazon business.

Amazing.com, Inc was co-founded by Matt Clark and Jason Katzenback in Austin, Texas. Amazing.com offers online and live training sessions, teaching people how to develop their own successful Amazon businesses. They believe in helping entrepreneurs achieve financial freedom through the success of their own Amazon business.
