

Cruvina's Shatterproof Plastic Wine Glasses Are Designed With Anti-Tipping Technology

March 05, 2018

March 05, 2018 - PRESSADVANTAGE -

Cruvina, providers of shatterproof plastic glassware, announces that their wine glasses are designed with anti-tipping technology.

Anti-tipping technology can be defined as those design elements that ensure that a cup or glass stands firmly on the surface on which it is placed so that it does not tip over easily. Cruvina wine glasses have three of these design elements: 1. Stemless bottoms which are straight. By removing the stem, the bowl of the glass sits flat on the surface. This brings the center of gravity down to the surface so that the glass is more stable. 2. Bottoms which are as wide as the top of the glass. Bottoms which are smaller than the opening of the glass tip over more easily because they can become unbalanced. 3. Sturdy plastic that is thin and light, but does not bend or break easily.

Erin Moor, Co-Founder of Cruvina, shares, "While the term "anti-tipping technology" may be unusual, the concept it stands for is not. Basically we are all looking for plastic drinkware that is beautiful, sturdy and doesn't tip over easily when we set it down. Unfortunately, some plasticware is not of high standard, and the glasses or cups are poorly designed and flimsy. This can result in spillage due to the glasses or cups tipping over. We at Cruvina solved this problem by using special design features and a wonderfully sturdy plastic."

The plastic used for the Cruvina cocktail tumblers is known Tritan plastic, which is created by Eastman. This plastic was chosen because it can be molded into a beautiful shape that fits nicely into the hand. As well, it has a clarity that resembles "real" glass. And just like "real" glass, Tritan plastic is both scratch-resistant and odor-resistant. After repeated use and washing, the glasses retain their shine. Furthermore, since Tritan plastic is virtually shatterproof, the glasses are safe to use as well. Even if they do get knocked over or dropped, they won't break.

Cruvina customers appreciate the anti-tipping design features. Says one, "I purchased these glasses about three months ago so I could enjoy wine at the beach. They are perfectly suited for outdoor use. They are sturdy, difficult to knock over, and look lovely as well. I highly recommend them."

Each box of Cruvina stemless wine glasses comes with four 13-ounce glasses. They are available on Amazon and comes with a 30-day money-back guarantee.
