

Abco Tech Announces Its Release Of The Selfie Monopad Bluetooth Selfie Stick

July 02, 2015

July 02, 2015 - PRESSADVANTAGE -

Brooklyn's Abco Tech, has announced the release of its latest Bluetooth selfie stick. Currently expanding and gaining a wider reach in the online marketplace, Abco Tech has created a powerful and useful Bluetooth selfie stick that is set to stand out against the competition.

"Here at Abco, we have long been selling tech gadgets that our customers love," says an Abco Tech supervisor. "We have been around since 2011, and right now we are in the process of expanding our products in order to keep up with the needs of the growing customer base," he continues. To address the ever-changing needs of the techy customer, Abco Tech began to develop a selfie stick that would accommodate even the most meticulous selfie-taker. The Bluetooth selfie stick, which Abco Tech released and launched last May 2015, has been a hit.

The Abco Tech Bluetooth selfie stick comes in two colors: black and white. The product's detailed specifications can be found on <http://www.amazon.com/Bluetooth-Selfie-Stick-Self-portrait-built/dp/B00WGSZ9QO>. "Our selfie stick's specifications are different from everyone else," a tech supervisor from Abco states. "It's a self-portrait

monopod with a cell phone clamp, plus it comes with an extendable wireless stick and a built-in Bluetooth remote shutter. What further sets us apart however, is that our selfie stick can be folded to fit in your pocket, which makes it perfect for travel or vacations" he explains.

What makes Abco Tech's product stand out is the inclusion of a cell phone clamp that is sturdy and durable. This feature makes the product easier and safer to use. Measuring up to 39.5 inches long, the product is very easy to carry. More details can be accessed on <http://www.amazon.com/gp/aag/main?ie=UTF8&asin=&isAmazonFulfilled=1&isCBA=&marketplaceID=ATVPDKIKX0DER&orderID=&seller=A3TBSD6IMA8DZX&sshPath=>.

The clamp is stronger compared to the other brands selling similar products in the online marketplace. The selfie stick's clamp can be removed with just a pull and be reattached with a simple push. There's no need for screwdrivers to replace screws, as most selfie sticks being sold in the market have.

The keen consumer would benefit from Abco Tech's Bluetooth selfie stick, as it acts as an all-in-one selfie stick. It has the pairing, shutter, and stick all on one single piece. There is no need for wires or remote shutters. "We made this product with the safety and convenience of our customers in mind," Abco Tech's spokesperson asserted.

The product's Amazon page states that the Bluetooth selfie stick has been getting a lot of good reviews. Customer feedback and rating currently stands at an impressive 4.9 out of 5 stars, with over 110 buying customers. Queenzany, an Amazon customer who gave the product 5 stars, said: "Abco Tech's Selfie Stick works fantastic, and is well-made, too!"
