

Resilient Beauty Delivers Healthier Skin With Their Bath Brush

June 26, 2015

June 26, 2015 - PRESSADVANTAGE -

Woodinville, WA based company, Resilient Beauty, has announced that their Bath Body Brush helps men and women obtain more naturally glowing, healthy looking skin. The brush uses the ancient secret of exfoliation and massage through a dual head brush. One side has 100% all natural bristles, while the other offers massaging rubber nubs that work to gently smooth cellulite over time. The company has said the following regarding the use of this brush and why it could save the skin of those who purchase it:

"Your skin is your body's largest organ -- and almost a third of your body's impurities are expelled through the skin. Daily brushing removes dead cells on the skins surface while flushing toxins beneath the skin. Brushing improves health by boosting circulation to increase blood flow to your cells and restore your skin's vitality."

The Resilient Beauty Body Bath Brush can be used dry or wet, and comes with a 16" handle for hard to reach places without stretching or straining. It can currently be purchased for \$15.87 through the company's sales channel, and a current promotion allows consumers to get more than one brush, or one brush and one other Resilient Beauty product with a discount of 15% off. They invite new customers to [Click here](#) for more information on how the brush works and what it can do to brighten and renew their skin. Resilient Beauty has

also said:

"For very little time and effort, you can greatly IMPROVE YOUR HEALTH by regularly brushing your skin with our AMAZING BODY BATH BRUSH. WET or DRY, SKIN BRUSHING is a healthy way to improve your blood circulation, lymphatic systems and more. SCRUB your way to better health!"

The dry brushing method offered by the brush provides users with the ability to shed dead and dry skin particles, which can be itchy and cause discoloration. This reportedly helps new skin to grow and rejuvenate, where it has been stifled and covered by dry flaking skin before. In order to see the best results, the company suggests that users try this method for 30 days. This allows time for cellulite to begin shifting and smoothing beneath the skin, and for the outer layer of dry skin to be completely removed, and to begin renewing itself.

Dry skin and cellulite are not the only benefits the brush offers, as mentioned above, using this tool can also help with circulation. As the bristles or nubs are rubbed across the body it helps blood flow to regions that may not always get enough. Similar to stretching the body before a workout, this is said to be a great way to wind down at the end of the day.

Resilient Beauty is so confident in how well this brush works that they are offering those who try it a 30 day customer satisfaction guarantee with no hassles, no questions asked, and a full money back promise. Those who are unsatisfied can contact them and return the brush without trouble. So far the results provided by previous users, and the ratings and reviews found online show highly positive results from use of the Body Bath Brush, and the company hopes to see it continue to flourish over time.
