Jacksonville Dentist Dr. Harris Rittenberg & Associates Offering New Patients A \$209 Value for Free

June 24, 2015

June 24, 2015 - PRESSADVANTAGE -

Dr. Harris Rittenberg & Associates, a preventive, general, and cosmetic dental office, is giving its new patients a free consultation valued at \$209.

"We understand what our patient needs. We focus on preventive dentistry, and our main desire is to help them limit some of the obstacles that might get in the way of achieving that perfect smile", says Dr. Rittenberg, an award-winning Jacksonville dentist." This is the reason why we are giving free consultations that include digital photographic series, radiographs, smile analysis, a comprehensive evaluation, a consultation with me focusing on a treatment plan based upon their priorities and budget, and the exact fee and financial options that they can use for payment."

Dr. Rittenberg, a practicing dentist for over 25 years, is known for his exceptional work and integrity. He was awarded the honor of being one of "America's Top Dentists" for general and cosmetic dentistry based on experience, training, board certification, and professional association.

Ancelle Jackson, one of Dr. Rittenberg's patients, says: "Love Dr. Rittenburg and his staff. They take really

good care of me. They're very friendly, courteous, and professional. Ever since I changed dental insurance in 2012, I've been to 4 other dentists in Jacksonville and nobody even came close to Dr. Rittenberg...He's by far the best dentist in Jacksonville. I highly recommend him."

The office's "Relaxation Dentistry" is a hit for most of their patients. Oftentimes, some people who need dental work avoid going to the dentist due to anxiety of having a dental treatment. This procedure calms and relaxes the patients through verbal and physical cues, sedative medications, and prescription strength numbing gel. Their pain-free injection called "The Wand" is another way to eliminate anxiety. This revolutionary computer-controlled local anesthetic is virtually pain-free.

"Dr. Rittenberg is a very nice, down to earth dentist", says Dinah R. "I had a fear of the dentist prior to going to his office, but after my second appointment, my fear was gone. During all my appointments Dr. Rittenberg made sure that I was comfortable and that I was always looking forward to my appointments! I recommended him to all my friends! Thank you Dr. Rittenberg for taking my fear of the dentist away. Special thanks also to Ms. Paula, she did an excellent job in cleaning my teeth, and she's awesome! To all who work there, thank you and good job! "

It takes just one visit to realize that the office is literally built with the patient in mind. "We have flat screen TVs in each room, I-pods with a variety of music, neck and lumbar support pillows, sunglasses for sensitivity to light, and also personal lip balm for our patients." Dr. Rittenberger explains. "All these are designed to provide a relaxing atmosphere for patients. Hopefully, they'll leave our clinic feeling like it was the best dental experience that they've had in their lives."
