

Cruvina Shatterproof Plastic Cocktail Glasses Can Be Used By The Pool

March 16, 2018

March 16, 2018 - PRESSADVANTAGE -

Cruvina, providers of shatterproof plastic glassware, announces that their cocktail tumblers can be used to serve drinks by the pool.

Erin Moore, Co-Founder of Cruvina, shares, "Relaxing by the pool with a nice cocktail is one of my favorite activities. Since I am outside on a stony deck, I don't want to risk accidentally dropping and breaking my crystal glasses. But I also don't want to drink out of a flimsy plastic cup. This is why at Cruvina our goal is to provide a safe and aesthetic experience. So our cocktail tumblers are made from Tritan plastic."

Tritan plastic is a high-quality plastic made by Eastman. It is scratch-resistant and shatterproof, so it will not break if dropped on a hard surface. It has a high level of clarity and shine so that it looks like real glass. Because it is stain-resistant, it retains this clarity through repeated use and washing. It is also odor-resistant and contains no BPA, making it safe.

Cruvina cocktail tumblers have been designed with anti-tipping technology and a comfort spill-guard rim. They have the classic design which is at home in both formal and informal settings. They can be used both for fancy cocktail parties by the pool or to serve juice at your child's birthday pool party. The glasses can be used for any cold drinks, from old-fashioned to water.

Cruvina customers have been happy with the quality, safety and versatility of the glasses. Here is what one had to say:

"LOVE these glasses. Also picked up the stemless wine glasses. Perfect for pool, patio - anywhere glass is a no no!"

Each box comes with four completely reusable glasses. Cruvina cocktail tumblers are available on Amazon and come with a 30-day money-back guarantee.
