

Hummel's Continues To Ramp Up Its Automotive Diagnostic & Repair Service

July 07, 2015

July 07, 2015 - PRESSADVANTAGE -

Hummel's Automotive Diagnostic & Repair, an auto repair shop located at the heart of the Fort Pierce Business Park in South East St. George, Utah, is revving up its auto services to show appreciation and gratitude to its loyal customers. The proud owners, John & Janice Hummel, saw the need of rising from the ranks against its counterparts. Having this in mind, they unrelentingly toiled towards its success.

For over 20 years of working with vehicles, Hummel's has built the trust and respect in and out of the community as their prime choice for automotive services. John Hummel shares, "This is a family business and we want everyone to feel welcome and comfortable bringing their vehicle in for service. We want our customers to know that we are trustworthy and reliable, and that when you let us fix your vehicles, you can be assured that everything will be taken care of."

Hummel's Automotive Diagnostic & Repair is a one stop shop for automotive needs. It offers an array of automotive services including air condition repair, auto inspection, auto diagnostics, auto repair servicing, brake and engine repairs. It is open from Monday to Friday, from 8am to 6pm. Hummel's offers a free Rewards Card with over \$185 in savings for customers which includes discounts on oil changes and repairs,

just stop by or call to get your card.

Here are a few of Hummel's satisfied customers: "Thank you. I just had my older vehicle go thru a safety inspection. These guys are honest! They weren't looking for bogus work, just honestly inspected my vehicle and told me what needed to be taken care of. I would be comfortable taking all my repair needs to their shop. Thank you again." (Greg Allen, DDS)

"I was very happy with the work that was conducted on my car by Hummel's Auto Repair. They fixed my car really quickly and were very nice and friendly. I felt like they were very honest and straight forward with me about the problems with my car. I feel like I have built some trust with this company and plan to bring my vehicles here for and future auto repair needs." (Michael Clark)

Hummel's is excited for its new high tech shop. This location started in July of 2009, and since then, has added a lot of much needed space so that it can work on more vehicles at any one time. It has added a extra bays as well as more square footage to its work space. This will help in serving its customers in a timely manner and allow them to continue their history of excellent customer service.
