

The Top Dog Deals Releases Quilted Dog Car Seat Cover

June 05, 2018

June 05, 2018 - PRESSADVANTAGE -

Online business The Top Dog Deals is proud to announce the release of their latest product, the quilted dog car seat cover. The company focuses on offering products that enhance the quality of life of both dogs and their owners, and this particular product has been designed to make sure that more dogs are able to go for longer walks without destroying vehicles. The product is already proving to be very popular.

"Dogs love nothing more than to go on long walks," says a representative from The Top Dog Deals. "This often means traveling in the car but unfortunately dogs have no concept of keeping things clean. In fact, a lot of people are reluctant to take their dogs very far because of the fact that it means they need to valet their car straight away. With our dog car cover, you not only protect your vehicle, you also protect your dog."

The solid black cover is a one size fits all cover made from Oxford cloth and PVC. It clips to the headrests of the back seats, as well as the headrests of the front seats, thereby protecting the entire area while also filling the leg space between the front and back seats. It is fully waterproof, making it easy to clean after it has been used. Weighing one kilogram and measuring 136cm by 147cm, it is also easy to take on or off and to store in the boot of the car.

The company has also announced the release of the product on Twitter. The representative explains: "We have a very active social media following, building a community of fellow dog lovers. We're happy to see that our followers on Twitter are already loving the seat cover."

People are also encouraged to share images of their quilted seat cover in action on Instagram. This will give others the opportunity to see how comfortable it is with its quilted design and how much dogs are loving it. The representative ends: "We can't wait to see all your pictures from dogs happy to have been on an amazing walk, sitting proudly in the car."
