

Mold Remediation Houston Company Updates Its Practices

April 30, 2018

April 30, 2018 - PRESSADVANTAGE -

Mold Removal Doctor Houston, based in Houston, TX, has announced that they have updated their mold removal practices to offer the most state of the art solutions. This is part of their commitment to always being the best and most up to date mold removal service provider around. Thanks to the new technology, they can guarantee that their work is done right the first time.

William White from mold removal service provider says: "We set ourselves apart by always being up to date with new developments in the world of mold remediation. This enables us to guarantee excellent service work the first time around and our customers can trust on our results. We leave no crevice unchecked and provide full and thorough mold remediation."

Mold Removal Doctor Houston offers a complete mold abatement service, resulting in the removal of 99.9% of the infestation. They also provide their clients with a full printout of all the processes that were performed and what the expected results are. Homeowners who are experiencing mold problems in their property, therefore, are encouraged to contact the Mold Removal Doctor Houston as soon as possible to get the issue resolved.

"Mold is a fungus found everywhere, indoors as well as outdoors," explains William White. "Molds release air, water, or insect-borne spores and produce mycotoxins that are likely to have negative effects on human health. If you are living in an environment that is affected by mold, you are more likely to have allergies, asthma, sinusitis, or other respiratory conditions. It cannot be stressed enough, therefore, that mold is dangerous and must be eliminated straightaway."

It seems that the message of mold being dangerous has hit home because the mold remediation Houston service provider has reported a significant increase in demand for its services. This may also be a result of the storms that have hit Texas and the rest of the country over recent months, which has resulted in conditions favorable for mold growth. William White says: "If you suspect you have mold, call us today to get things sorted out. Whether it is fresh mold or old mold, we can get rid of it for you."
