

Up And Coming Tech Reviewer Aaron Wilhelm Reviews Smart Scale

May 07, 2018

May 07, 2018 - PRESSADVANTAGE -

Aaron Wilhelm, a Youtuber known for being entertaining, educational and engaging with his viewers provides need to know information via high-quality video reviews on his Youtube channel. Aaron states on his channel that his "ultimate goal is to help viewers make an educated buying decision."

The BF1 Body Fat Analyzer by Adam Elements has quickly become a success on the smart scale market. Aaron Wilhelm, dedicated father, husband and lover of all things tech, couldn't resist testing out the Smart Scale for his viewers.

The scale allows users to scan body weight, BMI, body fat, muscle percentage, bone mass, body water percentage, and BMR (basal metabolic rate). The Body Fat Analyzer does this through a safe, low-level electrical signal that travels through the body.

"This scale is worth checking out. I've had no issues with it at all... It's just been a really enjoyable experience with a cool piece of tech that I highly suggest to anyone that's in the market for something like this," he mentioned in his review.

BF1 body fat analyzer helps to keep people motivated and track their healthy lifestyle. The BF1 smart scale is designed to improve users overall health by providing them with a wide range of information.

?My favorite feature of this scale is the ?feature? of being able to add family members to the App so that you can motivate each other,? Aaron added. The scale syncs via Bluetooth to the GoHealthy app for iOS and Android devices. When users step onto the scale, it activates the Bluetooth and sends information to the App.

The BF1 Body Fat Analyzer is made of tempered glass which gives it a unique design. The lightweight smart scale has no buttons on the top, the only buttons on the scale are found on the back side which allows users to change the reading from kilograms to pounds. The BF1 can be purchased through Amazon.com or the Adam Elements website.

Adam Elements is a leading global brand focused on smart products that fit people?s modern lifestyle. Adam Elements manufactures products for mobile phones, computers, and drones. They also have a GoHealthy line with a range of products to benefit users health. OTG devices, along with intelligent software applications, provide customers with a vast array of products and services.
