

## **Who Else Wants To Have The Best Iphone 6 Case Customer Experience?**

*July 02, 2015*

July 02, 2015 - PRESSADVANTAGE -

Fantastic Trades Global, a company that offers a variety of of electronic product accessories on Amazon, has recently introduced one of the most sought after limited releases in Amazon to date: the Protekme iPhone 6 case.

"We're so excited to finally launch this product, especially since we've been getting so much positive feedback from our customers who have already purchased them", a spokesman for the company says. "I always say that it's better to protect your phone by placing it in a Protekme case than risk damaging it in the end. And for the price of \$12.99, I'm sure many users are not complaining."

Arnel, an avid user of the case has only good things to say about the case: "The black hard protective cover with kickstand and holster, which is specifically designed for the iPhone 6, does not only look and feel terrific to the touch, but also delivers perfectly well on its promise of convenience, good looks, durability, and affordability all rolled into one. The colors don't wear off, and the fit is snug and secure on the phone. With the integrated kickstand, the unit's usability is even more enhanced as it makes watching videos convenient for the user. You may adjust the viewing angle according to your needs. Choose whether to position your unit

sideways or standing up, either way, you get the benefit of hands free usage solution. However, I suggest that when using the kickstand; always go for the horizontal or parallel position as this is sturdier than the vertical or standing up position. From experience, tapping the top part of the unit when it is vertically positioned tilts it backwards, which opens the possibility of dropping or damaging the phone. On the other hand, the built-in belt clip on the front cover ensures the unit is securely attached to a belt or strap. With all these benefits, you definitely get your money's worth!"

"It's very simple and effortless to put on and remove the case which is a big plus if you are like most users and have many cases", says Daniel de Leon, an iPhone user. "Next I have to say that all the connections and buttons have plenty of space for you to click and connect things to without adapters or tricks. People like me with big fingers hate having to use our nails because we cannot access the buttons. The textured case combined with the smooth edges make a nice balance in this phone between slick and rough. That will let you grip and also slide your phone in and out of your pocket without issues. The front plate locks to the case and the clip grabs on well. "

The product is backed up by a Lifetime No-Hassle Free Replacement Guarantee, and can be found at [http://www.amazon.com/iPhone-4-7-Case-Protective-Investment/dp/B00RPUS9GA/ref=sr\\_1\\_1?ie=UTF8&am p;qid=1433545816&sr=8-1&keywords=B00RPUS9GA](http://www.amazon.com/iPhone-4-7-Case-Protective-Investment/dp/B00RPUS9GA/ref=sr_1_1?ie=UTF8&am p;qid=1433545816&sr=8-1&keywords=B00RPUS9GA)
