

Schlicher Orthodontics Launches 3 D Virtual Office Tour On Its Website

July 25, 2018

July 25, 2018 - PRESSADVANTAGE -

Schlicher Orthodontics, based in Pleasanton, CA, is proud to announce the addition of a 3D office tour capability on its website. With this 3D virtual office tour, patients looking for orthodontic care would be able to virtually visit the Pleasanton office and get an idea of its ambience and what it would feel like to actually visit the dental office, which provides state-of-the-art orthodontic care for people in Pleasanton and the entire Tri-Valley.

"A 3D office tour is a fantastic way to show prospective patients what they can expect," says a representative from Schlicher Orthodontics. "After taking a virtual tour of our office, a prospective patient will instantly feel at home when he or she finally visits our office. This contributes a lot to making patients more comfortable when undergoing treatment."

Schlicher Orthodontics is a dental clinic that focuses on offering emergency orthodontic care as well as other orthodontic treatments. A full list of services is available on their website at <http://www.pleasantonortho.com/>. People who are searching for a new dental professional, and particularly an orthodontist, are always advised to perform in-depth research not just about the practitioner who will be seeing them, but also the clinic itself.

The representative continues: "By using the 3D virtual office tour, people can quickly see what the clinic looks like, even before they have attended for a consultation. This is an important piece of customer service that allows prospective patients to become familiar with the office, which would substantially reduce the stress that they might experience when visiting a dental office."

Schlicher Orthodontics and Dr. Will Schlicher in particular are highly trusted and respected. For instance, on the clinic's Facebook page, Jennifer G.D. says: "The Schlicher Orthodontic Team has made this a painless process and never pressured us or gave us a sales pitch. Whether you have kids or you want to straighten your teeth as an adult, you'd be wise to make an appointment. Beautiful office, kind and knowledgeable people and a doctor who involves his patients in the process."

Those interested in getting more information about Schlicher Orthodontics or Dr. Schlicher can visit the orthodontic clinic's Facebook page.
