

Newly Launched Baby Crib Sheets Have Unique Features

May 30, 2018

May 30, 2018 - PRESSADVANTAGE -

Newly launched Las Vegas, NV business Baby Stopper recently introduced their baby crib sheets. This product quickly started to attract a number of positive testimonials, mainly relating to the unique features offered by these crib sheets. The company looks forward to developing more products and designs.

"These crib sheets have been designed with comfort and safety in mind," says Sahan Asad from Baby Stopper. "Furthermore, they are also designed to help make the world a better place because they are certified to be organic and chemical free. We believe that babies deserve nothing but the best for their start in life, and that is what we offer them."

The baby crib sheets are 100% Global Organic Textile Standard (GOTS) certified organic jersey cotton sheets. This means that parents can place their babies in their cribs and let them sleep without having to worry about their sensitive skin coming into contact with harsh chemicals. Additionally, the crib sheets have been designed to fit perfectly in a crib thanks to their double elastic lining and the 9" pockets. Sahan explains: "Our sheets will fit perfectly on your baby's crib so they will not slip up, get tangled, or bunch up. This is an added bit of safety and security for your baby as well."

The company has also ensured that keeping the sheets clean would be easy, making the crib sheets out of 160GSM fabric. This means that they can be washed again and again without ever losing their elasticity or softness. Indeed, 160GSM fabrics have been shown to last much longer than regular cotton.

Perhaps of greatest importance is that the baby crib sheets are printed only with AZO-free dyes, ensuring that babies are not exposed to dyes that could irritate their skin. Sahan says: "Our AZO-free dye ensures that you can be safe in the knowledge that no harsh chemicals will touch your baby's sensitive skin. AZO-free means that all metallic particles have been removed from the dye."

Baby Stopper is so convinced that parents will love the sheets that they have offered a 100% satisfaction guarantee. So far, they have not had to make good on this offer as all purchases have been satisfactory.
