

Balance Buddy Bike Training Device Available With Free Shipping For The 4th Of July

June 28, 2018

June 28, 2018 - PRESSADVANTAGE -

Ingenious Products Inc., based in Clarence, NY, has announced that they will be offering their Balance Buddy bike training device as an affiliate program beginning July 4th. Those interested can review the balancebuddy.info site to find out how Balance Buddy can be used by parents to easily teach their children how to ride a bike and how easily sales can be made with this innovative device.

Richard Conway from Ingenious Products says: "The Balance Buddy is the ideal solution for helping your children to learn to ride a bicycle without the use of training wheels. Around the world parents teach their children to ride a bike. It's a snap to put together and you'll have your child out riding a bike in no time. The Balance Buddy is designed to help your children learn to ride a bike more easily and help you to teach a child more quickly and with less stress. Those who order it on Independence Day will enjoy free shipping for their purchased Balance Buddy."

The Balance Buddy is a high quality device fitted with a non-slip safety grid. It can be adjusted in height so that the bicycle can continue to be used as standard. It also comes with a durable chip resistant finish and is very easy to install and to take it off. The device has been designed to make it far easier and faster for children to learn how to balance and to ride a bicycle properly.

Those who have purchased the Balance Buddy have been very happy with how it has helped their children. R. B., for instance, says on the company's website: "My daughter was so dependent on the training wheels on her bike, she & I both were beginning to think she would never ride a bike without them. Then a friend told me about this Balance Buddy she used to teach her kids to ride a bike. 25-30mins, with the "Balance Buddy", was all it took to teach her to ride her bike. I was simply amazed."

The device has been designed to replace training wheels. It is for parents who are looking for a way to build confidence in their children so that they are able to learn how to balance on a bike much more quickly. This enhances their safety, while also reducing strain on parents' backs.
