

ProfitArcher Announces Digital Marketing Services For The Philadelphia Dentist

June 25, 2018

June 25, 2018 - PRESSADVANTAGE -

ProfitArcher, a digital marketing agency in Wynnewood, PA, has announced that they now offer done-for-you digital marketing services for dentists in the greater Philadelphia region. This helps dentists focus their website, email marketing, and social media so that they can generate more quality leads for their dental office. By using services like digital marketing for dentists, these offices can set themselves apart from the competition and convert more leads into patients.

"Digital marketing is no longer something that can be done as an after thought," says Greg Koorhan, founder of ProfitArcher. "In the past, dental offices would rely on word of mouth, directories or general advertising, but prospective patients are too distracted now. Our done-for-you service can help reach potential patients where they are, rather than passively hoping they will find you."

The new service is geared specifically towards dental offices, which have their own unique needs. It includes every element of digital marketing of importance, from website development to content writing to social media. And because it's done-for-you, ProfitArcher sees themselves as a partner with the office, allowing the doctors to focus on what they were trained to do. Greg Koorhan continues: "Over the last few years, I have made it

my mission to assist people who help other people, and become an expert in helping brick and mortar businesses grow using Digital Marketing. We've spent countless hours researching and testing so we can guide our clients with what works, what doesn't work, and in what order they should do everything to get the biggest bang for their buck."

By offering dental marketing to the Philadelphia dentist, ProfitArcher aims to add significant value to the local community, effectively bringing its clients into the 21st century and the digital age. Dental offices who wish to continue to remain relevant in and attract new patients are encouraged to contact the company as soon as possible to discuss the possibilities. ProfitArcher can then get to work in developing a package that will work and that will deliver measurable results in terms of profitability.
