

DigitalRez Announces Launch Of Condo And Strata Websites

June 26, 2018

June 26, 2018 -
DigitalRez, a company with offices in Canada, Austalia and Barbados, that develops digital reservation systems for the hospitality industry, has announced the launch of new RezExpert websites for niche industries, specifically condos and stratas. In addition, they will soon launch other niches, which are for campgrounds, RVs with mining, B&B, marinas, and more. For condos, the website can be found at https://condo.rezexpert.com/.

According to Kevin Hall from DigitalRez: "We are a company dedicated to customer service in the development, provision and servicing of the business technology requirements for the condo property industry. With the RezExpert software specifically designed to be fully integrated, easy to use and extremely reliable, we can cater to condo institutions and businesses of all types and sizes. We encourage you to learn more about our various solutions."

The new condo website includes a range of features and modules. Specifically, it comes with CRM features, online HOA access, unique accounts, a branded app, credit card processing, automated emails, access control, reputation management, and a housekeeping module. It also includes central management, data

mining, a document management system, multiple condos listed on a single database, batch printing, rental management, membership management, a maintenance module, dynamic reporting, automated billing, IP security, and owner rental and inventory management.

Meanwhile, the strata industry can also enjoy very similar features, as shown on https://strata.rezexpert.com/. Kevin Hall explains that these features have been made possible thanks to the proprietary DigitalRez 'grid'. He explains: "RezExpert is the most advanced Java based property management system in the world. Utilizing a powerful, easy to use grid interface that replicates the familiar calendar. The grid can switch between properties with numbers in each cell representing inventory. Easily switch to the individual unit view for listing by each unit within the property. RezExpert also provides right click functionality for shortcut access for speeding up property management access."

People are encouraged to review the different RezExpert websites for further information. New websites for other niche industries will soon be launched. Also, a live demo of the system can be arranged on request and people are encouraged to take advantage of that opportunity to see what it is all about.
