

Adam Elements? USB Type-C Adapter For Greater Productivity

June 28, 2018

June 28, 2018 - PRESSADVANTAGE -

Adam Elements, a leading provider of smart technology, announced the latest addition to its line of USB Type-C connectivity solutions. The CASA V01 Type C to VGA adapter is designed to expand users laptop screens onto a VGA monitor. The adapter is compatible with a wide-range of devices including assorted MacBooks and MacBook Pros, HP, Dell, Google Chromebook Pixel, and any other USB-C ready computer.

"Our adapter is made with customers' needs in mind as the latest laptops are embracing the famous USB-C interface, leaving them unable to connect their devices," an Adam representative said. "Our USB-C adapter expands their laptop's screens either at work or on the go."

The small adapter has exceptional color and video resolution of up to 1920x1200, supporting sharp resolutions. It offers a plug and play design allowing users to quickly display their screen on a VGA projector without having to install extra software.

Users can extend or mirror their computer's display to a projector, monitor or HDTV to increase productivity. The adapter is ideal for displaying content on VGA enabled monitors at work, school, or home.

CASA V01 is designed in three different colors and with simplicity in mind. Its revolutionary USB Type-C connector is reversible, enabling users to connect it both ways. It is designed to reduce signal distortion and shield against electromagnetic interference for completely uninterrupted use.

Adam Elements is a global provider of smart products that fit people's modern lifestyle. They manufacture innovative, high-performance and reliable products that help users connect to the newest technology. From accessories for mobile phones to computers and drones, their OTG devices and intelligent software applications provide customers with a vast range of products and services. The V01 along with other products by Adam Elements is now available on Amazon.com for purchase.
