

Summit Foundation Repair Indianapolis Launches New Website

July 16, 2018

July 16, 2018 - PRESSADVANTAGE -

Indianapolis, July 2018 ? Summit Foundation Repair, a full-service foundation repair company that services Indianapolis, Indiana and Central Indiana announced the redesign of their website: <https://summit-foundation-repair-indianapolis.business.site> and an expansion into Hamilton County, Indiana including Marion, County.

Summit Foundation Repair Indianapolis specializes in helping homeowners, property owners, commercial property owners and more help fix critical foundation repairs. Those interested can contact Summit Foundation Repair at 317-434-1733. According to John Adams, one of the biggest mistakes people make if they think that have a foundation problem is waiting too long. ?A simple foundation problem can develop into a major issue if it goes unchecked. What can be a simple fix can escalate quickly over time. We recommend people err on the side of caution and call us if they have any questions.?

Summit Foundation repair is a locally owned and operated foundation repair company serving Central

Indiana including the 9 donut counties around Indianapolis. Whether there is a small crack in the slab foundation, a basement, or a potential plumbing leak it is important to get the problem diagnosed correctly. ?Believe it or not, we see a lot of issues with foundations because of the extreme temperatures we experience in the Midwest, ? said Adams. ?The winters here are extremely brutal, and of course when you get close to 100 degrees in the summer the expansion of material makes things a challenge.?

To the question of what should property owners or managers do if they suspect they have a foundation problem, Adams replied, ?Well, of course call us. It?s easy to say that but a diagnosis is a lot cheaper than a complete overhaul. Nobody wants to pay for foundation repair, but, better to do it early before things get out of control.? As far as the type of projects Summit Foundation Repair has worked on Adams says they have seen everything. Barns, basements, commercial buildings, office buildings, apartment buildings, houses, livestock feeding, retail, commercial, industrial?if it has a foundation, we?ve seen a problem with it.?
