

Landscape Contractors In Chandler AZ Launch New Custom Project Gallery

July 25, 2018

July 25, 2018 - PRESSADVANTAGE -

Edgewater Design Company, one of the top landscape contractors in Chandler AZ, are proud to announce that they have updated their website to include a brand new, easy to use, custom project gallery. This has been designed to give people the opportunity to see pictures showcasing the work that the company can do. At the same time, it can provide homeowners with inspiration on what they can also do for their own home.

Matt Palmer from Edgewater Design Company says: "We have worked with numerous clients across greater Phoenix Arizona to their complete satisfaction. We have always taken photographs of the work that we have done and we are now able to share them with prospective clients. To make it easier for people to find examples of what they are looking for, we have divided our gallery into a number of categories: backyards, decking, hardscapes, kitchens & BBQs, pools and spas, shade structures, special features, and water features. Do let us know what you think and feel free to contact us for a free quote."

What is immediately clear from the gallery is how committed the company is to creating innovative and meaningful outdoor spaces. They want to ensure that their clients will not only enjoy their outdoor spaces, but they can also continue to enjoy it by focusing on sustainable practices that are of the highest possible quality.

They believe in building personal relationships with each of their clients, in which their passion for landscaping and hardscaping shines through. Their many customers have regularly shown their appreciation for this commitment. Wayne C., for instance, says on Houzz: "Edgewater designs did a fantastic job on my pool and built-in BBQ Ramada. They kept us on time and within budget. I will use them again."

So committed is the company towards the quality of their work that they also offer a full, non-transferable, warranty. For their landscape designs, this includes a one year warranty on all properly cared for trees and shrubs. Roses, tender shrubs or trees, grasses, and perennials are warranted through the growing season they were planted in. Matt Palmer explains their hardscape warranty: "All properly maintained hardscape installations are warranted for two years against workmanship. We believe in what we do and stand by the quality of our work."

People are encouraged to view the gallery so that they can get a better impression of the kind of work that the company has done. It is evident that they are experts in creating amazing outdoor spaces that can actually be lived in while not having a negative impact on the environment. This commitment to excellence is something that has set Edgewater Design Company apart from other landscape designers in Arizona. Matt Palmer continues: "We are dedicated to bettering the lives of our clients, engaging fully in our community, and protecting the environment by creating sustainable, individualized outdoor spaces. We set ourselves apart from other landscape companies by offering design and quality driven services and products."

The Edgewater Design Company currently serves properties in Chandler, Gilbert, Queen Creek, Tempe, Ahwatukee, Mesa, Scottsdale, Paradise Valley, Fountain Hills, Carefree, and Cave Creek, AZ. They are also happy to expand into nearby areas. Because this is a narrow geographical area, the geology in each of those locations is very similar. Hence, those who are considering working with the company in order to have their own outdoor spaces redesigned can be rest assured in the knowledge that any work showcased in the gallery can be possible in their own garden as well, space permitting. The company offers a complete free and no obligation design consultation during which they will be happy to showcase what is possible.

The company also has an active community on Facebook at <https://www.facebook.com/edgewaterdesignco/>. Here, they share important news and information about landscaping and gardens, while also sharing images that are included in their gallery. In so doing, they give others the opportunity to comment on completed work, to ask questions, and to be inspired by existing designs. Many have also taken to Facebook to express how happy they were with the service they received. Kayla L., for instance, says: "Edgewater did an incredible job building our outdoor kitchen and adding a wall with stone in another area of our home. It was the first company we've used that actually showed up when they said they would and got the job done perfect. I'd highly recommend this company."
