

# Eisner Laser Center Absorbs LASIK Costs By Offering \$100,000 Savings To Its First 100 Lasik Consultations

*June 25, 2015*

June 25, 2015 - PRESSADVANTAGE -

The Eisner Laser Center, Central Georgia's laser vision authority, is giving away \$100,000 worth of amazing Lasik savings to the first 100 patients who schedule a free consultation. "If eyeglasses have been a burden for you all your life or you're tired of struggling with contact lenses, LASIK might be the perfect answer to your problem" says its spokeswoman.

"Millions of people want LASIK. One of the main reasons people delay having the procedure is concern over LASIK costs", says Dr. Eisner. "Eisner Laser Center is making LASIK affordable for everyone. With the savings we're offering, many more people can experience the positive, life-changing benefits of LASIK "

Whitney, a patient of Dr. Eisner, agrees about the benefits: "I've been wearing glasses since 7th grade, now I see 20/20! Dr. Eisner is great and I have total confidence in what he can do."

The Eisner Laser Center utilizes state-of-the-art technology to perform iLASIK, the most advanced laser vision correction available today. Beginning with a custom WavePrint of the eye, iLASIK then combines bladeless Intralase and precision CustomVue laser technology. This procedure offers unparalleled precision and remarkable visual outcomes. Intralase has set the standard for flap creation in the United States, taking the safety and efficacy of LASIK to new heights. LASIK is normally described as a painless procedure with a quick recovery.

"I've gotten some amazing results already", says Oyemon, a patient of the Eisner Laser Center. "I see probably 10 times more than I did before and I can only expect more improvement through the next coming days and weeks. So I would advise anyone who is thinking about it to get it done." You can find out if you're a candidate for this amazing procedure and special promotion at [www.dreisner.com](http://www.dreisner.com) .

The Eisner Laser Center's chief surgeon is Dr. Richard Eisner, who has performed nearly 20,000 laser vision correction procedures in his career. His approach to LASIK and patient care combines world-class experience, top-tier technology, and one-on-one patient interaction. His patients agree. Ramona says, "I

want to thank you for the care you have given me and the kindness you and your staff have shown me since my first visit to your office...thank you from the bottom of my heart!" "By putting LASIK financially more in reach, the Ultimate \$100,000 LASIK Giveaway offers more people the opportunity to have their own LASIK story" says Damian, the clinical coordinator at the Eisner Laser Center. "In conjunction with the \$100,000 LASIK savings, we've even expanded our financing options to include 24 months interest-free financing".

Dr. Eisner has been an ophthalmologist since 1984. His refractive surgery career began with radial keratotomy (RK), a pre-laser refractive procedure. In 1996, when LASIK was FDA-approved he launched his LASIK career and has specialized exclusively in LASIK/refractive surgery since 2000. He was the first ophthalmologist in Central Georgia to perform laser vision correction and today is Central Georgia's first choice for laser vision correction.
