Chicago Clinic Launches New Dental Implants Website

July 30, 2018

July 30, 2018 -
1st Family Dental, a clinic in Chicago, IL, is proud to announce that they have recently launched a website dedicated to dental implant treatments and services. The website is designed to help provide people with important information on dental implants. At the same time, it has also been designed to provide a better user experience for people who are considering Chicago dental implants and oral surgery.

Vicky Khawaja from 1st Family Dental says: "We offer a full range of general, cosmetic, and specialty dental services for the whole family. With online appointment booking and 14 convenient locations in and around Chicago IL, we're here to serve you and your family with regards to your dental health needs. We have placed a focus specifically on our dental implant services with the launch of our new website and encourage you to take a look if you are considering this procedure."

The new website points out that a consultation is required before someone can undergo a dental implant procedure. The clinic offers a completely free and no obligation consultation to all potential patients. Functionality has been added to the website to allow scheduling of an appointment online, although people can also choose to contact the clinic by telephone. Vicky Khawaja explains: "During the consultation, patients will learn about their various options, the duration of the treatment, whether their insurance plans cover it, what finance options are available, how long will recovery take, and so on."

1st Family Dental is one of the largest dental clinics in the area. Indeed, for dental implants Chicago suburbs residents may also take advantage of the services. 1st Family Dental has 14 locations in total, eight of which are in the suburbs. People can have anything from one tooth to all teeth replaced with dental implants at any of these locations. The goal for the clinic is to help everyone have a beautiful smile.

People who have undergone a dental procedure at the clinic have been full of praise of the service they have experienced. They mention how fair, quick, and professional the service is and how the staff members were able to make even the most nervous patient feel at ease. Angie K., for instance, says on Facebook: "Cannot say enough good things about Dr. Akhikar and his staff here. I come here for my regular cleanings and recently had the best experience with a new dental implant. Dr. Akhikar is a perfectionist and the entire procedure was completely painless. Space is clean, professional staff, easy to get an appointment."

Meanwhile, the new website is also dedicated to the clinic's oral surgery procedures. They offer surgery when needed, whether it is to remove a wisdom tooth or to rebuild or repair parts of the jaw, nose, and teeth. Oral surgery is offered under sedation and the clinic has a number of different sedation methods available to ensure that a patient can relax and won't feel pain while undergoing a procedure.

Dental implants, meanwhile, have become increasingly popular as of late. Vicky Khawaja notes: "Chicago dental implants are the closest possible option for tooth replacement. With proper care, maintenance, and regular checkup visits with your dentist, they are designed to last for life. Dental implants can be used to permanently replace one, several, or all teeth in the upper and lower jaw. Many people with implants can't even tell the difference between their natural teeth and their implants, and neither can their friends and family."

Rhonda R., meanwhile, says on Yelp: "I would recommend this dentist to anyone. The whole office was really kind. I had to get an extraction and Dr. Akhikar did an awesome job with numbing my mouth, where I didn't feel a thing. I've had a terrible [dental] experience before but he was great." This further highlights the attention the clinic gives to each of the patients, ensuring they do not experience any discomfort when they undergo a procedure.

People who require dental care in Chicago or the suburbs are encouraged to visit the 1st Family Dental implants website, which can be found at https://implants.1stfamilydental.com/. Through this website, they can obtain all the necessary information and book their free, no obligation consultation.
