

Sahe Products Launches Cutting Boards For Kitchen

August 01, 2018

August 01, 2018 - PRESSADVANTAGE -

Sahe Products, a business in Irving, TX, that has been successfully selling kitchen products on Amazon for the past three years, is proud to announce the recent release of their latest product, the kitchen cutting boards, which are available at <https://amzn.to/2Ak8Tjz>. While these cutting boards, which come in two different sizes, have only recently become available, they have already received a number of positive reviews.

H Misra from Sahe Products says: "We are very excited about our latest product. Being made from bamboo, they are strong, durable, clean, beautiful, and very fashionable. Furthermore, bamboo is also an environment-friendly material. We're very happy to see that our customers have already started to like our product."

The new cutting boards are made of the highest quality bamboo to ensure sturdiness and durability. These are two-sided chopping boards suitable for mincing, dicing, slicing, chopping, and more. Misra continues: "I have one myself and I sometimes use it to present little snacks and as a cheese platter. This is just one of the many uses of this cutting board."

The cutting boards are sturdy, thick, reversible, and incredibly attractive because of their natural look. They

are designed to never break, bend, splinter, or crack. Instead, the boards will last for years and users can be assured that they won't have to replace them regularly.

Bamboo is known to be an excellent material for chopping boards as it is friendly to knife blades. Misra explains: "Bamboo wood is quite soft, particularly when compared to plastic. This means it won't cause the knife blade to become dull. But more importantly, it stops bacteria from growing. Additionally, we have used the highest quality, 100% organic bamboo wood, making it safe to use for vegetables, meats, herbs, and more, whether you're chopping, mincing, slicing, or dicing. Your prep work will take very little time to complete."

Although only recently been made available, the cutting boards have already received a number of positive reviews. People seem particularly appreciative of the fact that it comes in two different sizes, making it perfect for all kitchens, as well as the fact that it is made of such a high quality material. "Good size cutting board for a small family like mine. I like the material, size, and ease of cleaning the product...", says a happy Amazon customer.

The first available size of the cutting board measures 9" by 13" and the second size is slightly larger at 10" by 13.5". Both sizes are suitable for all types of kitchens. Additionally, being made of bamboo, the boards are surprisingly lightweight and therefore very easy to move around and to store. They are also very easy to clean and keep hygienic. Misra continues: "It really is up to your own personal preference which of the two sizes you prefer. Neither is so large or bulky that they will get in the way. If you have any questions about the cutting boards, their sizes, or anything else, do send us a message and we will answer you as soon as possible."

Indeed, the customers who have purchased and reviewed the item have talked not just about how much they appreciate the beauty, strength, and durability of the item, but also of its design, which allows the board to be stored with ease. "The cutting board is a great size for cutting small items. I like that this one has a handle so I can hang it up on a hook," says an Amazon customer.

Sahe Products has also ensured that their cutting boards are easy to care for and easy to use. Indeed, they will never dull a knife's metal blade, and they are equally suitable for use with ceramic knives. In addition, they are very easy to clean. Misra says: "The cutting boards require washing by hand, but you really only have to wipe them down and they will be ready to be used again. Because they are made of bamboo, none of the bacteria from what you have just cut on the board will penetrate the wood, so all the user has to worry about is simply keeping the surface clean. However, it should also be noted that because they are made of bamboo, they are not dishwasher safe."

The company stands by all the products it offers. Hence, every purchase is backed by a full money back

guarantee as can be seen at <https://amzn.to/2OpUSDP>. This is a testament to the company's reputation of providing only the highest quality products and best value for money. They place the customer central to everything that they do and encourage people to get in touch should they have any issues, comments, or queries. This is true for all of their products.
