Carpet Cleaning Panama City FL Business Develops 8 Step Cleaning Program

August 01, 2018

August 01, 2018 -

Panama City, FL- CCS Floor Care, a carpet cleaning Panama City FL business, is proud to announce that they have upgraded the way they deliver their services. Those who require their carpets to be cleaned, whether for regular cleaning, pet stain removal, or any other reason, can now take advantage of the company's comprehensive 8 step process. This ensures that people know where they stand and what to expect from the service, while at the same time delivering consistent, high quality results.

Mark Broersma from CCS Floor Care says: "We offer a wide variety of complete cleaning options to provide you with professional treatments that can completely remove tough stains, embedded dirt, hidden allergens and harmful germs and bacteria. Our talented team of technicians are highly trained and have several years of experience in the industry. They work diligently and treat your space with the care and respect it deserves. Nothing cleans more thoroughly, or protects your investment better than our cleaning system."

The first step of the carpet cleaning program is pre-inspection. A service technician will fully inspect the parts of the carpet that require cleaning, while at the same time looking at the construction of the carpet and the condition of the soiling. Because CCS Floor Care is always open and transparent, they will inform their clients

of any permanent stains that they find as well. Mark Broersma continues: "We will never give our clients false hope. Some stains simply cannot be removed and we will always inform you of this beforehand."

The second step of the system is the commercial pre-vacuum process. CCS Floor Care uses a special turbine vacuum system to perform this, which removes bonded and dry soil. It is essential for this step to be done first and CCS does it very thoroughly, even if they have to move furniture pieces, such as tables and chairs. Should clients also wish their carpets to be cleaned under larger pieces of furniture, they can make arrangements for this.

CCS then performs a pre-spray and pre-spot process, particularly in high traffic areas, before moving on to the pre-groom stage. Mark Broersma explains: "Your carpet will be pre-groomed with a carpet groomer or rotary cleaning machine (depending on the soil level) to further loosen soil on high traffic areas."

Those who have used the services of CCS have regularly named it the best carpet cleaning services Panama City FL has to offer. Asia H., for instance, says on the company's Facebook page: "Incredible quality of service. Knowledgeable, friendly, professional technicians and office staff. I have used CCS professionally for a business and personally in my own home countless times. Carpet, tile, and upholstery cleaning and flooring repairs used frequently. Always satisfied with the outcome, would recommend to any business or individual."

Once the pre-groom stage has been completed, the team will get to work on the extracting and rinsing step. The soil should be loosened sufficiently at this point and the carpet pile will then be thoroughly flushed. The water temperature used for cleaning is always strictly maintained between 180 F and 190 F and the pressure is also tightly controlled. This ensures that the carpet does not get too wet. Meanwhile, they make sure that the pH level in their solutions are properly balanced so that no sticky residue is left behind on the carpet.

At this point, the carpet is usually very clean. However, CCS believes in ensuring quality service, which means they will once again inspect the carpet and perform post-spot treatment. Mark Broersma continues: "If any spots are not removed during the cleaning process, specialty spotting techniques are employed. Permanent stains identified by our service technician may not be removed, but our clients will have been informed of that beforehand."

The next step is post-grooming. At this stage, the pile of the carpet is set specifically in one direction which ensures that it dries more rapidly and that it looks better as well. Finally, CCS service technicians conduct a post inspection. They request the customers to inspect the carpet themselves to ensure that they are completely satisfied. Only at that point is the job signed off.

CCS Floor Care offers their services to residential and commercial properties alike. Those interested in having their carpets cleaned can request a free, no obligation quotation from the company's website at
