Dallas Foundation Contractor Launches Pier And Beam Foundation Repair Service

August 20, 2018

August 20, 2018 -

Texas Foundation Pros are pleased to announce that their people have the knowledge and experience to ensure that foundations for buildings of all sizes can be returned to optimum condition. The company offers pier and beam foundation repair which is accurate and affordable. Pier and beam foundations can become damaged from a myriad of causes. The damage usually does not happen overnight or in a short span of time unless there is a catastrophic natural event. Years of deterioration and perpetual lack of maintenance can make any pier and beam foundations vulnerable.

A spokesperson for the company explains, "We specialize in exceptional pier and beam repair. Our experts carry out an extensive inspection to analyze the problem. The field technicians conduct a thorough study of your foundations and note all the problematic issues. We do not presume any problem and we plan our response only after we have a clear understanding of the extent of damage."

"We have a well-planned approach to repair these types of foundations," he continues. "Following our assessment and determining the scope of the repair, we clear the immediate work area. We clear the plants and other materials, lay out tarps to protect the immediate surroundings of your property and dig a hole

manually to gain access. We decide the different points of installation even before we dig the hole so we can be chart out the whole process."

The world-class foundational service utilizes the best state-of-the-art tools such as hydraulic jacks and hydraulic arms. These tools raise the floor to the optimum level. Concrete cylinders then replace the hydraulic jacks, ensuring the proper support over the long term. The excavated area is then filled in and all the debris removed.

The Texas company also provides concrete slab repair as announced recently at <https://www.pressadvantage.com/story/21543-dallas-foundation-repair-company-provides-slab-foundation-repair>.
