

## **Dermatologist In Newport Beach Gets Five Star Reviews**

*August 30, 2018*

August 30, 2018 - PRESSADVANTAGE -

Stefani T Kappel MD, who operates a dermatology clinic in Newport Beach, CA, is proud to announce that the reviews she has received from her patients are predominantly five star reviews. Dr. Kappel pointed out that most of her patients had expressed their satisfaction about the results they experienced, mostly with the Botox treatment that they had received. Botox Cosmetic is a prescription drug that is injected into the muscles as a way to temporarily improve the look of patients with moderate to severe crow's feet lines, forehead lines, and frown lines between the eyebrows.

Dr. Kappel herself says, "With years of specialized training and experience, I am known to be one of the most innovative and comprehensive Newport dermatology doctors to address your skincare needs. We always strive to provide the best quality care. Nevertheless, we were pleasantly surprised to find that most of the reviews from our patients have been five star reviews. We are very grateful that our patients have been very satisfied with their results and this serves to motivate us to continue serving people to the utmost of our ability."

Adria S., one of the patients who provided a five star review, says: "... When I walked into Stefani's office the

first thing I noticed was the decor, which is super cute, and there were a solid number of people in the office. To me that is a good sign to see that people come here and seem to be enjoying themselves. I got called back to a room and Stefani came in to talk to me. She is so sweet and very transparent. I loved how she explained the differences in options and she dropped a lot of good knowledge. She also doesn't pressure you at all into buying any products or procedures. Today I decided to try some fillers to enhance my cheekbones and lips and then some Botox to reduce some volume on one side of my jaw. I hope it turns out well but I feel confident that it will."

Another patient who gave a five star review, Orion L., says: "Kappel and her staff were very cordial and professional in their assessment. I came in and was shown to a room almost immediately at my appointment time. They were able to do the botox and fillers the same day I came in, which was much appreciated given my busy work schedule. No issues during the actual injections and were very patient during the procedures. They took great care in administering each injection and checked in to ensure a positive experience."

The dermatologist in Newport Beach wants to emphasize that Botox is a minimally invasive cosmetic procedure and has several benefits, such as: little or no downtime for the patient, minimal risk, quick and immediate results, can be performed in stages if the patient prefers it, fewer follow ups, variety of options, office-based appointments, and ability to fine tune. Dr. Kappel wants people to understand that while Botox is "Botulinum toxin" and some people might be nervous about this, the FDA has approved it for several decades now and it has been proven to be safe for use as medical treatment in many specialties. The way Botox works is to safely relax the muscle activity in that particular area that is treated. There is practically no recovery time needed and possible side effects are very minimal.

Aside from Botox, Dr. Kappel offers other treatments, such as: the Fraxel Dual 1550/1927 laser treatment for aging and sun-damaged skin; Kybella injectable treatment for eliminating fat cells under the chin; the Juvederm collection of hyaluronic acid fillers that are designed to add volume to a different area of the face, to plump the lips, smoothen parentheses lines, or lift cheeks; the Radiesse dermal fillers that are designed for smoothing moderate to severe facial folds and wrinkles, such as the creases extending from the corner of the nose to the corner of the mouth; the Sculptra Aesthetic that is designed to help stimulate the skin's natural collagen production to help increase facial volume that was lost to aging; and the Vbeam Perfecta pulsed-dye laser for treating lesions such as acne scars, leg veins, facial and spider veins, Rosacea, pigmented lesions, vascular lesions, stretch marks, and warts.

Dr. Kappel earned her medical degree from the University of California at Irvine and completed her residency in dermatology at UCLA. She was full-time faculty at UCLA as a Clinical Instructor and Professor in Dermatology and Dermatologic Surgery. She also completed advanced fellowship training in dermatologic surgery at the Laser & Skin Surgery Center of Northern California with world-renowned expert, Dr. Suzanne Kilmer.
