

FlashBright Says Bike Tail Light Is Essential For Outdoor Survival

June 26, 2015

June 26, 2015 - PRESSADVANTAGE -

Flashbright, a business in Tea, SD, have recently released their bike tail light on Amazon and have stated that they believe it to be an essential outdoor survival tool. To celebrate the launch, they have placed it on a special 50% discount offer, meaning it is available for just \$24.97. For a limited time only, it also comes with the free Outdoor Survival Guide book, valued at \$12.99, to those who register their purchase. This will also entitle them to the lifetime warranty.

"We are true experts in the field of outdoor survival", says Ryan Marks from Flashbright. "So many people now think of that as being linked to doomsday prepping. While our information may be beneficial to those people as well, we are focused more on ensuring that people who enjoy the great outdoors, particularly on their bike, are able to enjoy it safely. That is what our bike tail light is for as well."

The tail light is very easy to install and doesn't require any specialized skills, tools or knowledge. As soon as it is installed, it comes with three different settings. These settings allow people to use the light during the day and at night, regardless of the weather. It is said to be the most versatile dual LED bike light available today. Users can choose rolling light flash, flashing or constant bright modes. This will enable them to always be

visible, keeping them safe from other traffic.

The light also comes in two colors, being black and red, so that people are able to pick their own personal preference. Flashbright takes tremendous pride in the quality of their product, which is why it also comes with a 100% satisfaction guarantee. Plus, for those who register, a lifetime warranty is also available.

"We want to encourage everybody to sign up for the lifetime warranty, which will also entitle them to the free Outdoor Survival Guide", adds Ryan Marks. "Furthermore, people can like us on Facebook, where they will be able to receive information about our products and outdoor survival as a whole, as well as joining a community of fellow outdoor lovers."

The micro bike light has five LED lights so that it is always visible. Two of those lights are red and the others are white. This means that the bike is not just more visible to upcoming traffic, but also to the riders themselves. Furthermore, it is completely waterproof, so it will shine brightly even in the worst rain storm, when visibility is often at its poorest.

The special introductory offer is available for a limited time only and while stocks last. Customers are encouraged, therefore, to get theirs quickly. They are also reminded that a bike light is vital to road safety for any cyclist.
