Magnetic Sponsoring, the original attraction marketing system, was developed by Mike Dillard in 2006 to train both novice and seasoned network marketing professionals to more effectively generate leads and increase revenue. The system is reported to be especially useful for beginning or struggling network marketers looking to increase lead generation and experience success in their business opportunity. The Magnetic Sponsoring system provides users with training that helps position them as a leader, enabling them to attract network marketing leads, rather than spending valuable time seeking them out.
