

Best Small Laser Engraver Included In Online Store

February 19, 2019

February 19, 2019 - PRESSADVANTAGE -

Cheap 3D Printer Cost has announced that they have recently added a small laser engraver machine to their online store. This is a DIY desktop mini blue laser engraving machine that can also be used for laser cutting. More information about this laser engraver can be found at <https://vimeo.com/roywingatedigitalmedia>

Roy, a spokesperson for the online store, says, "We have just made available on our online store the Woliike 7000mw laser cutting/engraving machine. Please note that included with this laser engraver is a pair of laser goggles to ensure safety for the user."

According to the spokesperson, this desktop mini blue laser engraving machine is suitable for an amateur laser engraver for grayscale painting and low-light positioning. It measures 72 cm by 63 cm and its maximum engraving area is 65 cm by 50 cm. It is made of stainless steel and acrylic and its laser power is 7000 mW. It can be used to engrave in various materials like wood, plastic, bamboo, leather, paper, rubber, and bank card. When used for cutting, it can be used on paper, foam, and thin leather materials. The company warns that it could not be used for engraving on stone, metal, ceramic, light-reflecting materials, shell, and transparent materials.

Users of this laser engraver are also advised to wear protective glasses like the laser goggles that are provided. Parents should not allow their children to play with the device. And users should avoid having flammable gases or objects nearby as this could result into a fire or an explosion.

Despite being recently added to the store, the product has already received a number of positive reviews, with most of them being five-star ratings. For instance, Paxton C., who gave it five stars, says, "I bought these for my husband. Husband just love em. Thank you." Torrey D., who also gave the product five stars, says "This product is great. Arrived early and in great shape. Very easy to use. Thank you so much. Will order more from you."

Meanwhile, for those who are not interested in a laser engraver and are curious as to what other products are available, Cheap 3D Printer Cost has recently announced that it has added 5 new collections, namely:

the Useful & Fun Gadgets collection, Cheap 3D Printer Cost collection, Small Woodworking Lathe collection, Cheap Laser Engraver Cost collection, and Night Vision collection.

The Useful & Fun Gadgets Collection is made up of a wide range of items. These include a DVD R310 Dual Lens Dash Cam with Infrared Night Vision, a Foldable Pocket Drone Selfie RC Drone with Remote Control and 720P WiFi Camera, a Mini Wifi FPV RC Drone with Camera Real Time Transmission with LED Light, a Funny Ceramic Mug with a Middle Finger Gesture Inside the Cup for Mixing Coffee and Milk, Cat Eye Sunglasses for Women, an Ambarella A7 Car DVD Dash Camera with GPS Logger G-sensor, IPX7 Professional Waterproof Bluetooth Wireless Headphones, and creative iPhone cases.

The Small Woodworking Lathe Collection is made up of lathe machines for wood, such as a CNC Lathe Machine with Water Cooling Spindle for 3-axis metal engraving and wood routing for full assembly; the 60W 12000 RPM Mini Metal Rotating Lathe Model Making Tool Milling Machine; a 5-axis CNC milling machine; the 6 in 1 Lathe Machine Tool Kit for Drilling, Sanding, Turning, Milling and Sawing Plastic, Metal or Wood; and a Wood Lathe CNC Machine for engraving, drilling and milling.

The Cheap 3D Printer Cost online store also has a Catalog section and included are different kinds of products, such as a liquefied gas welding torch weed burner, a car battery charger pack for jump starting and auto emergency power bank for starting a car, screw extractor drill bits, a 1/4-inch quick release shut off gas adapter for propane hose, a 29+ carbon mountain bike, a flexible shaft metal extension screwdriver drill bit holder for the electric drill, a 3 in 1 power cutting tool with built-in pruning shears and wire cutter utility knife, and electric grinding abrasive tools.

For those who want to know how long it would take for an order to arrive, Roy points out that it will usually arrive within 10 to 12 business days for those located in the US, Canada, UK and Australia. For other countries, the waiting time could be as long as 28 business days because it is dependent on the customs clearances and the location of the warehouses for that specific country.
