More information about this product can be found at Cheap 3D Printer Cost webpage at <https://vimeo.com/roywingatedigitalmedia>.

Roy from Cheap 3D Printer Cost says, "We are happy to announce that car owners no longer have to worry about scratches on their car paint. We now have the Atreus Model W-BuQiBi scratches repair pen. With this, there is no longer any need to pay substantial fees for repairing car paint scratches."

The Atreus Model W-BuQiBi auto car scratch repair paint pen has been designed for covering up small scratches. This paint repair pen is available in six colors: black, gray, silver, blue, red, and white. Each pen uses organic solvents and coatings and can take care of an area of 0.08 square meters.

Roy says, "There are two ways to use it, open the cover upwards to use the tip pen, unscrew the cover counterclockwise to use the brush. There might be a slight color difference but hardly noticeable. Please make sure to use this pen during sunny days to ensure that the best effect is achieved. And before using it, make sure to remove car wax, oil stains and car glaze on the surface of the car paint. If there is some rust, this can be removed with fine sandpaper."
