

Austin Foundation Repair Company Receives Positive Reviews For Recent Projects

September 06, 2018

September 06, 2018 - PRESSADVANTAGE -

GL Hunt Foundation Repair and Gary Hunt are pleased to announce that they have earned the respect and admiration of local area home and business owners. The proof of this statement is the Austin foundation repair company getting good reviews from its clients and customers. For many years, the firm has been operating throughout Texas to perform repairs and restore faulty foundations for homes and businesses. The firm understands that local businesses gain many of their customers because of the positive reviews by friends, neighbors and family members.

The company was featured in a recent news release "Austin Texas Foundation Repair Contractor G. L. Hunt Announces Expansion".

According to a representative of the organization, "We want each customer to enjoy the experience with our firm from the assessment to final cleanup and approval. The experience is due to the actions of our crew and the quality of our products and procedures. We ensure that we use the correct equipment, regardless of the size or complexity of the project. We also respect the area around the worksite, so that no plants, vehicles or individuals are damaged during the process."

He continues, "Before we begin work for any customer, a complete and accurate assessment of the structural damage is conducted by our professional team. We look for the existence of manifestations which might indicate that repairs are needed or encouraged. We present these findings to the client before any work is started so that the customer knows what must be done and how much it is likely to cost. We never suggest that work be done which is not needed."

More of GL Hunt's foundation repair announcements can be found at their press room <https://www.pressadvantage.com/organization/g-l-hunt-foundation-repair-austin>.

The professionals at the firm know that prompt action and attention to damage in the foundations is crucial. Catching problems early and making the needed repairs will prevent more costly problems later on.
