

Breast Augmentation Honolulu Clinic Gets Consistent Five Star Reviews

September 17, 2018

September 17, 2018 - PRESSADVANTAGE -

Honolulu Plastic Surgery Center, based in Honolulu, HI, has announced with pride that the plastic surgery clinic has just received a five star review. In fact, the clinic which offers breast augmentation, nose lift, tummy tuck, and other procedures, has so far, received 20 positive reviews and all are five star ratings.

Dr. Randy Wong, the plastic surgeon at the clinic, says, "The medical and surgical field has changed a lot in my time as a doctor and I feel like I have adapted well to these changes. [...] Being a physician has been and will always be the most rewarding and challenging experience I have had in my life. If I had the choice to do it all over again, I would not change a single thing because it has led me to a great place in my life."

In the latest five star review, Anne N. says, "I am glad I chose this place. I felt comfortable with both the doctor and Maria. He explained everything without withholding anything and most importantly I love how my nose turned out. He fixed what I wanted and did everything in a safe way. I would recommend to anyone who would want to do this rout."

Meanwhile, in another recent five star review, Gae B. says, "My experience was so much more than an

outstanding surgical procedure as well the preparation and follow up. It was actually a confirmation of the best of life ... with the reminder in each step, word and nuance from Dr Wong of the power of our own wonderful energy. I'm So happy with the results of the procedure, and had minimal if any bruising, some well placed swelling that went down consistently and no pain or discomfort. Amazing! The third day after the surgery I was out running errands not feeling the least bit conscientious about the little swelling. I'm immeasurably grateful to Maria and her organizational skills and Dr Wong for his generosity in sharing his surgical skills and expansive wondrous energy. Thank you."

Aside from breast augmentation Honolulu residents can take advantage of other services at the Honolulu Plastic Surgery Center, such as facial rejuvenation, fat injections, tummy tuck, liposuction, blepharoplasty, and Advanced SkinCeuticals treatments.

The facial rejuvenation procedures, which are minimally invasive and require very little downtime for recovery, offer various benefits such as the reduction of wrinkles, elimination of hyperpigmentation, and being able to look years younger.

The fat injection procedures are also used to minimize the effects of aging. By having fat injections in certain parts of the body, wrinkles and other indications of aging are minimized. And by taking fat from trouble areas in the body, such as the hips or stomach, and placing it wherever it is needed allows for a two birds with one stone advantage. For instance, the fat that is removed can be used for enlarging the breasts, which eliminates the need for breast implants.

Meanwhile, those who have lost weight may discover that they have excess skin around their abdomen. This cannot be removed by any amount of exercise. It can only be eliminated through a tummy tuck procedure.

Then, of course, there are the breast augmentation procedures, which are for those women who are not satisfied with the size and shape of their breasts. The advantages of the breast augmentation procedures offered by Dr. Wong include the resizing and reshaping of the breasts ensuring that both are symmetrical and are big enough to boost their self-esteem; better fitting of clothing; and reduced recovery time.

Another important procedure offered by Dr. Wong is blepharoplasty or eyelid surgery. In this procedure, skin and fat are removed from the eyelids to make them appear more open and shapely. Also, by getting rid of excess skin around the eyes, the patient can achieve a more youthful look.

Dr. Wong is considered to be one of the best plastic surgeons in Honolulu. He has been ranked among the top doctors in Honolulu, specifically in hand surgery and plastic surgery. His reconstructive skills were obtained through his training under some of the best plastic surgeons in the world. What makes him different from other plastic surgeons is that he integrates the breathing techniques he learned through his practice of

Aikido. These techniques allow him to avoid any tremors or shaking when he is performing microsurgery. The steadiness of his hands had even earned him the distinction of being elected as Director of Microsurgery and Replantation Services at Hershey Medical Center in Penn State University Hospital.

Those who want more information about the procedures offered by Dr. Wong or who want to schedule a consultation can visit the clinic's website at <http://honoluluplasticsurgerycenter.com/>.
