Bill and Lori are customers and definitely happy they found Abbott's as written in their Google Review: "We just remodeled our kitchen and updated flooring and paint on the main and upper levels of our home. Abbott provided all the paint and carpeting for our project. Abbott was flexible and willing to work within the timeline of our remodeling company. Carpeting was the final piece of the remodel project. We had earlier ordered paint from Abbott and it was already on the walls. Exactly the color we were looking for. My daughter and I stopped in the store and were given excellent advice on carpet selection from Tim. He answered all my questions and offered thoughtful suggestions. He not only helped with decision making process by giving experienced answers, but insisted I take home the carpet sample board to show the whole family. We could all feel the carpet and see what it actually looked like in the house with the new paint and new kitchen lighting. I emailed Tim my carpet selections and he confirmed in writing. Per our arranged schedule, Tim came out and did the final measuring and followed up with pricing. He provided timing for installation and explained the process. Tim assured us we would not be disappointed with the service. Tim was right and we love the carpet. It is such an improvement and makes the whole house feel new. The installers were great and everything was done on time and within budget, as promised. The new paint looks great with the new carpet and our remodel is now complete."
