

Sleeping Bag For Adults Released By Venture 4TH On Amazon

September 25, 2018

September 25, 2018 - PRESSADVANTAGE -

Venture 4TH has announced that they have released on Amazon a sleeping bag and self inflating pad combination for campers. The waterproof sleeping bag is and is designed to provide comfort and warmth for those who are out camping or doing any outdoor activity that requires sleeping outdoors. The self inflating pad is being added free of charge with the sleeping bag until the end of October 2018.

Patricia Wright from Venture 4TH says, "Our latest travel accessory is the ultimate addition to any outdoor excursion. To celebrate the launch of the new sleeping bag, you get a self-inflating camping pad free with your purchase."

The sleeping bag is designed to provide sufficient space for a person to ensure comfort when sleeping outdoors and it is made with 210T waterproof polyester. This sleeping bag is barrel-shaped and has plenty of room for adults in the shoulders while hugging the rest of the body to provide warmth and comfort.

Patricia Wright adds, "This convenient bag is weather tested and capable of keeping you cozy in temperatures as low as 30 degrees F temperatures, without causing overheating in temperatures of 70 degrees F. We use the highest-quality materials on the market to ensure that a journey outdoors is focused on comfort."

Meanwhile, the self inflating camping pad is just as durable as the sleeping bag and is provided to give that extra cushioning a camper may want. And because it is self inflating, there is no need for a foot pump or blowing air into it after an exhausting hike or climb.

It should be noted that the sleeping bag from Venture 4TH has been designed for use in 3 seasons. It is a lightweight sleeping bag that has been tested to the highest standards and tests have shown that it can keep a person warm even in temperatures as low as 30 degrees F, without causing overheating when the temperature is as high as 70 degrees F. And because it is made from waterproof material, a person's sleep will not be interrupted by an unexpected rain shower.

Furthermore, this is designed to be a backpacking sleeping bag because it is lightweight and easy to carry. It only weighs 1209 grams with the plastic bag included. Thus, it is not inconvenient to carry while going on a hike or when mountaineering. The carry bag is also provided with a travel-friendly strap to make it more comfortable to carry it.

The team at Venture 4TH loves to travel and explore the great outdoors. And being travelers themselves, they are all too familiar with the problems that people face when roaming across the world, from TSA checkpoint issues, to charging technology in other countries, and also keeping valuables safe while exploring a brand new location. Thus, the Venture 4TH mission is to offer gear that can serve as solutions to the usual problems that travelers and outdoor adventurers often face. Furthermore, they guarantee customer satisfaction with the provision of durable and high quality products.

The products offered by Venture 4TH are all for the convenience of travelers and those who love to explore the great outdoors. These include the inflatable camping pad, RFID neck pouch, the self inflating sleeping pad, a quick dry microfiber towel, and a travel adapter and USB charger.

The RFID neck pouch is now also available in a new design and offers a way for travelers to keep their belongings secure and safe as they travel and explore the world. It is made from tear-resistant nylon and has a slim structure so that it is practically invisible when placed under clothing. It has an adjustable strap so that travelers can wear it around the neck, across the body, or across the chest. Its most important function is to prevent skimming of the traveler's contactless payment cards and passports.

Related to the RFID neck pouch is an RFID safe money belt. This can be used as an anti-theft organizer as it

can be slipped under the travelers' clothes preventing thieves and robbers from noticing that they have much money with them. And just like the other products, this money belt has been designed to ensure the comfort of the person as it is lightweight and ergonomically designed to remain cool and dry even if it is worn all day.

Those who need more information about the sleeping bag with free self inflating pad may visit the company website or their Amazon page. Patricia Wright says, "Get sleeping bag offer now. With summer over, you will find this combo of sleeping bag and self inflating camping pad to be very useful as the nights get cooler."
