

Sun Equipment Opens New Parts Division

October 01, 2018

October 01, 2018 - PRESSADVANTAGE -

Sun Equipment, a Virginia Beach, Virginia business that specializes in buying and selling used forklifts, is pleased to announce the launch of a new parts division of the company. The wide array of parts on offer can be used for most makes and models of forklifts and the company is offering to find a part if it is not in stock for customers.

Mike Hoskins of Sun Equipment says, "We can't be more excited to offer parts to our customers. We've been selling used forklifts for over 20 years, and being able to sell parts for virtually every make and model is a feather in our cap that I'm really proud of. Sun Equipment is dedicated to servicing businesses with professionalism and respect so they can get back to work quickly."

Hoskins says that forklifts work on a number of parts, and for many businesses trying to find replacements when machines break down, searching online can feel frustrating. "I understand how it feels when you just want your business to get back to normal and you're visiting websites and calling companies that might not even have the correct part because meanwhile, you're losing business," he says. "That's why Sun Equipment opened this new parts division. We want to be your one-stop shop for forklift parts so you can get back to

running your business as soon as possible."

A sampling of the types of the parts available at Sun Equipment includes gaskets, tires, transmission parts, pallet jacks and parts, cables, and brake parts. Hoskins says, "We sell virtually every part for your forklifts, from motor oil to alternators, and so much more. We want to get you the part you need at a competitive price, wherever you're located and get it to you as soon as possible with our nationwide shipping."

Sun Equipment offers forklifts with brands such as Mitsubishi, Nissan, CAT, Crown, Kalmar, and more. "Our inventory is diverse, expansive, and we'll guarantee we'll fill your business needs," Hoskins states. "And we also have forklift parts for all the brands and models we sell as well. Just call us toll-free or leave us your information on our contact form, and we'll call you right away."

The types of forklifts that Sun Equipment offers include Narrow Aisle Forklifts, Telehandlers, Rough Terrain Forklifts, Pneumatic Forklifts, and many more types. Hoskins says that every business has different needs, and Sun Equipment is dedicated to making sure business owners get the forklifts they need to keep their operations running smoothly. "If we don't have it in stock when you call us, we can get it for you," Hoskins says. "Don't bother running around on the Internet trying to find it when we can get it to you faster."

The service that Sun Equipment has been providing for over 20 years has been praised by the company's customers, who have given them a perfect five stars on Google Maps. American Pool said, "Mike was great through the whole process. He answered the phone every time I called no matter what time and answered all my questions. I was very skeptical in sending money before receiving the forklift I bought but Mike was upfront and informative about the process. Mike is already in the process of finding us another piece of equipment that we need for our business."

JP, in his 5-star review, said, "Great company to deal with and they will certainly get business from us again in the future... We highly recommend to others looking for forklifts and other equipment. Mike is a man of his word and has earned our respect and business."

Along with selling used and refurbished forklifts, Sun Equipment also sells scissor lifts, skid steers, batteries, and chargers. They offer financing for any kind of business budget, for both small and large companies. The company says they also buy used forklifts at competitive prices, and they even offer extra cash for them. "We work with all sizes of companies with all kinds of budgets," Hoskins says. "We'll work with you to get the best option for your business. Better yet, we ship nationwide, offer a free shipping quote, and stand behind all of our equipment, so don't hesitate to give us a call or drop us a line on our contact form at the website."

More information about Sun Equipment and their used forklifts, parts, and more can be found on their website at www.sunequipment.com. The company can also be found on social media on Facebook, Twitter,

YouTube, and Google+.
