

Hoot's Achieves 400th Positive Review As One Of The Best Beard Grooming Products

June 27, 2015

June 27, 2015 - PRESSADVANTAGE -

Tennessee-based health and beauty company, Hoot's Naturals, continues to score positive feedback and rave reviews from its local and international customers. Ricky Hooter, owner of Hoot's Naturals, makes sure that the company maintains its vision and mission in providing top of the line, best beard grooming products for men. Currently available at Amazon store, Hoot's Naturals Beard Balm has reached a very important milestone on the marketplace and have achieved over 400 reviews.

At 3.5oz, Hoot's Naturals Beard Balm is way bigger compared to other leading brands which are mostly 2oz in size. Since they take beards seriously, they have created the beard balm with all natural and organic ingredients. They use beeswax as their base to ultimately control the beast under any man's nose. It is infused with botanicals and organic essential oils such as Organic Hempseed oil, Jojoba oil, Grape seed oil, Argan oil, Murumuru butter, Vitamin E, and Rosemary Extract to provide long lasting moisture and itch-free experience. Said ingredients also help in fixing split ends and encourage facial hair to grow thicker, healthier and more lustrous than ever before.

As an added bonus, Hoot's beard balm also comes with a sturdy, heavy duty beard comb which is perfect for

styling and grooming. Unlike other beard balms, Hoot's beard balm is also notable for being unscented. It is devoid of any perfume or unwanted fragrance that may cause allergy. On top of these, it also comes with a 100% money back guarantee as an attestation of its commitment.

A happy, satisfied user shares his beard oil review: "Last week a coworker recommended this Hoot's Naturals to me so I decided to give the beard balm industry one last shot. I hopped on Amazon, put it in the basket and placed the order. It arrived in the guaranteed 2 day window through Amazon Prime. Opened her up and was initially surprised at the size of the can, the balms I've tried in the past were about the same diameter as the mouth of a shot glass, this thing was almost twice the size of a can of Copenhagen. It also came with a comb which was pretty neat. And not just a flimsy piece of crap like you'd expect for a freebie, but a nice thick comb that actually says "unbreakable", which I will definitely put to the test when it's time to order another can. It has a great texture, really easy to work to the skin providing moisture, but you don't feel like your beard was shoved in bacon grease. It also has a good hold if you try to put some shape to your beard. After using for a few days, my beard is super soft, and for the first time comfortable. I'd highly recommend this to anyone looking for a solid balm."
