

All Stars Appliance Repair Announces New Service in Homestead FL

September 24, 2018

September 24, 2018 - PRESSADVANTAGE -

All Stars Appliance Repair has announced that they have expanded their service area to now include Homestead, FL. The All Stars team has been collectively providing appliance repair services to homeowners and businesses for over 25 years. Adding a local service tech team in Homestead is the most recent addition to their growing coverage area in Miami area. Details of their appliance repair services in Homestead can be found on their Google Business site.

Phelps Scott, manager for the Homestead team, explained the decision to create a dedicated service team for the area: "Some of our best technicians were raised in Homestead and knew from personal experience that the residents there could use, and would appreciate, some top-notch repair services delivered by friendly, skilled technicians at an affordable price. Knowing that is exactly what All Stars Appliance Repair aims to do, it was a perfect fit."

When a major appliance breaks down or just isn't quite working right, it's often much more than a minor

inconvenience. If a refrigerator stops cooling, it won't be long before food begins to spoil, and no one wants to see that happen. That's why it's so important to be able to get same day service without needing to pay extra for it. Mr. Scott stated that same-day appointments are scheduled whenever possible, and there is never any additional charge for it.

While the risk of food spoiling makes for the most urgent calls, that doesn't mean other appliance issues aren't important to local families. Making sure that clothes can be washed and dried without needing to go to a laundromat and disrupting already busy lifestyles is equally as important to local families. Not being able to prepare food because a stovetop or oven isn't heating, or not being able to efficiently clean up the dishes by using a dishwasher can all lead to unnecessary stress.

Mr. Scott explained that the many years of experience behind All Stars Appliance Repair has allowed the company to understand not only how to quickly diagnose and fix problematic appliances, but to understand the stress such problems can put on customers. Understanding it allows the All Stars to keep fully stocked trucks so that almost any repair can be taken care of in a single trip. In the rare case where a technician requires more than a single visit, there is never any additional charge for the return trip.

"Putting a customer at ease and getting the job done right, quickly and for a fair price is what All Stars Appliance Repair is all about," said Scott. He said his team is looking forward to helping out the good people of Homestead and surrounding areas with whatever appliance repair needs they may have.
