

Natural Shampoo & Conditioner Breakthrough For Promoting Hair Growth Announced

October 15, 2018

October 15, 2018 - PRESSADVANTAGE -

Perfect Hair recently announced a breakthrough, new all-natural shampoo & conditioner combination treatment to promote hair growth that is sulfate and paraben free, color safe, and comes in a convenient pump dispenser. They explained that their proprietary blend of natural oils, herbal extracts, trace minerals, and amino acids allow this shampoo and conditioner to work at the hair's cellular structure to promote healthy hair growth and prevent breakage.

To help those suffering from thinning hair or alopecia hair loss, Perfect Hair has developed a cruelty-free hair care set that consists of one bottle of shampoo and one bottle of conditioner, both working together to cleanse and revitalize hair and promote hair growth. Working together the shampoo and conditioner have been found to also keep hair looking shiny, full and healthy. Both the shampoo and conditioner are made of natural products for a deep and intensive moisturizing treatment.

According to the American Hair Loss Association (AHLA), by the age of 35, 66 percent of American men have some amount of detectable hair loss. By the age of 50, about 85 percent of men have significantly thinning hair. The AHLA also cites that women actually make up 40 percent of American hair loss sufferers. For both men and women, thinning hair or hair loss can have a significant effect on how they feel about themselves.

Thinning hair and hair loss can be the result of many factors, but the most common reason is hormones. For women, changing hormone levels from birth control pills, pregnancy, or menopause is the leading cause of a woman losing her hair. For men, hair loss, in most cases, is due to the hair follicles' sensitivity to DHT (5 α -dihydrotestosterone). DHT is a male androgen hormone that causes follicles to shrink, resulting in a shorter life span and decreasing hair production. In addition to hormones, high levels of stress, thyroid conditions, or exposure to toxic conditions can all cause hair thinning or balding to occur.

Focus Natural Shampoo & Conditioner from Perfect Hair has been developed with ingredients from nature that have long been associated with hair growth. The ginseng root extract has been observed to

stimulate the scalp and promote longer cell life, while biotin, also known as vitamin B7, works with the body's unique chemistry to encourage rapid hair growth. They are scientifically formulated and safe enough to be part of the user's everyday routine.

"At Perfect Hair, we believe that nature holds the solution to the problem of weak and thinning hair. Our Focus Shampoo and Conditioner hair care products are made with the finest natural ingredients renowned for their nourishing and thickening properties," says a representative from Perfect Hair.

The sulfate-free shampoo uses a proprietary formula that is also free of parabens and uses only a blend of antioxidants from Argan oil, fractionated coconut oil, Jojoba oil, hemp seed oil, algae extract, Keratin, Biotin, Vitamin A, Vitamin C, and Ginseng root extract. This blend of hair vitamins has been found to work at the hair's cellular level to encourage healthy growth while also reviving dry and damaged hair.

The revitalizing conditioner uses a deep conditioning formula that nourishes hair while infusing and locking in moisture to give the hair all the nutrients it needs to fortify and revitalize it while also providing protection from split ends and thickening every strand.

"It really does help thinning hair and I really appreciate that these products are all natural. The shampoo makes my hair full and the conditioner keeps it soft and looking lustrous. It really is a product that does what it says," says Vanessa, a verified Amazon customer.

Many hair care products are loaded with chemicals and artificial ingredients that may cause scalp irritation. Others leave behind deposits that make hair feel dirty or greasy to the touch. Focus Natural Shampoo & Conditioner is free from harsh, ineffective chemicals and colorants and most known allergens, and washes away impurities on contact.

Both the shampoo and conditioner come in convenient 400ml/13.5 ounce pump bottles making them easier to use. To use it, the shampoo is applied to wet hair and massaged for one minute and then rinsed. After applying the conditioner, it is left on for three minutes and then rinsed for the moisturizing effect. Both the shampoo and conditioner are color safe and fade-out free. In fact, these natural products have been found to actually protect treated hair by helping it retain its color and shine, whether it's straight, wavy, curly or coiled.

The Perfect Hair Focus Natural Shampoo & Conditioner are guaranteed and Perfect Hair will return a customer's money if they are not fully satisfied with this product. Customers can find Perfect Hair Focus Natural Shampoo & Conditioner at Amazon.com.
