

Sarnia Dentists Hosted Halloween Week Open House

November 16, 2018

November 16, 2018 - PRESSADVANTAGE -

Edgewater Dental will host a Halloween Open House at 1330 Exmouth Street in Sarnia, Ontario, Canada. The event, which is set for the week of Halloween, was open to all clients, young and old. Refreshments, snacks, and cupcakes will be served throughout the week. Staff will don their favorite Halloween attire and be on hand to answer questions and visit with guests. Business will operate as usual during the open house, but appointments are not needed for those wishing to stop by.

Staff are eager to share their costumes, refreshments, and knowledge with visitors. Patients were encouraged to dress in their favourite Halloween costumes and share in the fun with the staff. The event will give young patients an opportunity to see the office and meet staff without the distraction of an appointment. It will give older patients an opportunity to casually discuss available services. Before visiting, staff members will encourage clients to check out the office's Facebook Page for pictures, updates, and other information.

Edgewater Dental has two dentists on staff, Dr. Tim Pringle and Dr. Jessica Milne. Dr. Milne is a third generation dentist, a certified Invisalign provider, and was raised in Sarnia. She works with patients of all ages with a special focus on individualized patient-centred care. Dr. Tim Pringle was also raised in the Sarnia area. He studied in England and currently practices dentistry part-time. Each dentist attends continuing education courses to ensure they are providing the best and most modern care for their clients. Each of them

offers an array of services, including general dentistry, cosmetic dentistry, and same-day emergency treatment. They are both certified by the Ontario Dental Association and the Canadian Dental Association.

The team at Edgewater Dental focuses on modern dental practices, using cutting-edge technology. Laser dentistry, a relatively new development in the dental field, is a favourite among patients who want to avoid the noise, pain, and residual numbness associated with regular dental work. Many procedures that previously required anesthetic or invasive drilling can be performed with a dental laser. Patients have reported a significant reduction in their anxiety and pain levels when they underwent procedures using laser dentistry. Laser dentistry is an ideal option for children who may otherwise be fearful of dental visits.

Edgewater Dental also offers a variety of cosmetic dentistry services. Invisalign, a method of straightening teeth using specially designed trays, is very popular with clients. Many prefer Invisalign to standard orthodontia because of its convenience, cost, and ease of use. Trays can be removed, allowing users to eat the food they desire without sacrificing their orthodontic progress or risking damage to metal brackets. Other specialized cosmetic dental services include tooth contouring, implants restoration, whitening, porcelain veneers, and porcelain crowns are also popular among Edgewater Dental's clientele.

Dr. Milne and Dr. Pringle are advocates of proper dental hygiene. They promote the prevention of dental problems through consistent brushing, flossing, and regular care appointments. Proper dental hygiene can reduce or eliminate the risk of cavities, but also more serious concerns including periodontitis. Learning good dental hygiene habits as a child benefits individuals for the rest of their life. The staff at Edgewater Dental hope to use the open house as an opportunity to educate new and existing patients of all ages about the benefits of regular dental hygiene and how they might benefit from the services at the dental office.

Edgewater Dental is open at nontraditional hours to meet the needs of busy clients. They are open Monday from 8:00am to 5:00pm, Tuesday through Thursday 9:00am to 7:00pm, and Friday through Saturday 8:00am to 1:00pm. The office is closed on Sundays. They provide direct billing to insurance and are currently welcoming new patients of all ages. Dr. Jessica Milne says, "The open house will be a great opportunity for clients, new and old, to stop by, visit, have some refreshments, and learn about the services we offer."

Staff hope to convey the warm and friendly atmosphere of their office to new clients and to offer thanks to the present clients.

Those interested in transferring their dental care to Edgewater Dental can find more information on their website.
