

## **Best Leaf Scoops Now Available With Lifetime Guarantee And Discount**

*October 18, 2018*

October 18, 2018 - PRESSADVANTAGE -

ReLeaf Leaf Scoops has announced that their original Releaf Leaf Scoops for fast and easy removal of leaves on the lawn or yard, which has a lifetime guarantee, is now available at 25 percent off. People can use the code "HULKHANDS" at checkout to take advantage of the discount.

These are considered to be one of the best leaf removal tools because they have received an overall rating of 4.8 out of 5 stars after receiving almost 1000 reviews. For instance, J. Bradburn has given the product five stars and said, "I have a lawn care company so to say I have tried everything almost seems redundant. Also, I typically do not get excited about a product because I feel it should do its job. However, these are seriously amazing. Ergonomically they [are] wonderful because the hand part is like a baseball glove. [...] Picking up

leaves is also great in that you can get a great amount, but you can also smash them straight down to compact them in the bag without the worry of hitting a stick and cutting your hands up...."

Andrea Gardner from ReLeaf Leaf Scoops points out that the leaf removal tool can save people a lot of time because it can get the job done fast, whether wet or dry with very little spills. It also serves to protect people from sharp twigs and stinging nettles. The user can also keep clean because the leaves and other debris can be scooped up without touching them and getting their hands dirty. And most of all, it can make cleaning the yard fun for the family as even the children can do it because of its ergonomic design, which converts little hands into huge bear claws.

In another review, JMB says, "I bought these scoops to help us clean up a yard that is surrounded by oak trees, which drop not only tons of leaves in the fall, but millions of acorns! Normally, we rake the leaves and acorns into piles then using the rakes, we gather and balance stacks of the leaves on top of the rake, then deposit into wheelbarrows. The activity alone of using the rake to gather and deposit the leaves is exhausting and hurts our backs so bad that it is very difficult. I have been seeing people using these scoop tools in their yards, and decided to give this particular style scoop a try, since because of the acorns in with the leaves... [...] These Releaf Leaf Scoops are fantastic. They turned a rather physically daunting chore into a much easier one, not to mention we spend literally less than half of the time that we normally have spent gathering up all these leaves and acorns...."

From the reviews and the overall rating of 4.8 out of 5 stars, it can be gleaned that these are one of the best leaf scoops available on the market. Andrea Gardner also points out that the leaf scoops can also be used for transporting and spreading mulch and compost. This is because the size of the scoops are just right for trash cans and yard bags. Also, the closed scoop design prevents small items from slipping out. Andrea says, "That's why with Releaf Leaf Scoops, our slogan is - We've got your yard uncovered."

The basic advantages of these leaf gathering tools can be summarized as follows: it is easy to hang and it is also stackable for storage purposes; it has a robust design; it has no moving parts which makes it very durable; a precision manufacturing process was used; and one size can fit all.

One customer noted that while the scoops are quite large, there is no problem for people with small hands. The hands can fit through the wrist "strap" and are straight with just the fingers curved so there is not problem with someone who has carpal tunnel syndrome. Meanwhile, another customer points out that they used the leaf scoops in their yard where the trees drop a mixture of leaves and pine tree needles from his neighbor's pine trees. He notes that he was able to scoop around 95 percent of the debris but he doesn't mind what was left.

This product only weighs 1.3 pounds and it measures 15 inches by 15 inches by 2.9 inches. It is ranked as

the bestseller for the rakes category in gardening tools. Furthermore, it has a lifetime guarantee, which means that people can purchase it risk-free.

Those who need more information or want to purchase can visit their Amazon sellers page.
