

All Clear Tree Service La Mesa Relaunches Website To Serve Customers In East San Diego County

October 12, 2018

October 12, 2018 - PRESSADVANTAGE -

After switching web hosting providers, All Clear Tree Service La Mesa has officially re-launched its website, ensuring tree service customers in east San Diego county are fully informed of the wide range of Arborist services offered by the company.

The newly re-launched site is located at <https://lamesa.allcleartree.com>. The site provides a key contact point for new customers in the La Mesa, El Cajon, Spring Valley, Lemon Grove and Santee areas, all of which boast a large population of shade trees in need of pruning.

October marks the beginning of the "dormant season" for San Diego county, and is an excellent time for tree trimming services as well as removing any diseased or sick trees that cannot be saved with tree care.

While tree service companies throughout the United States begin to hang up their equipment for the winter in October, San Diego county tree services actually get busier as property owners begin to plan for the winter storms that can make untrimmed trees dangerous.

"Because San Diego county experiences a very short winter, people don't always think about the sometimes intense storms that come between December and March," said owner Glen Markstrom. "Flooding and landslides can damage untrimmed trees in the area, which can be quite dangerous to houses and personal property if they fall."

While All Clear Tree Service La Mesa does offer emergency tree services to remove or cut trees that have already fallen or are close to damaging property, having an Arborist examine your property's trees before they are compromised is always the safest bet.

Safe Tree Removal

When All Clear takes on a tree removal project, safety is always the first and main priority. All Clear Arborists begin by evaluating a tree's position in relation to structures, cars, electrical lines and boxes and any other item that may become a hazard. Once the tree felling has begun, the work crew begins removing parts of the tree little by little, as opposed to all at once, which can be very risky.

Customers are encouraged to take advantage of All Clear's free estimates, which enables them to get a full understanding of tree removal costs up front, ensuring there are no surprises once the tree is down and the property has been appropriately tidied.

As an additional benefit, All Clear can provide the customer with their removed tree in the form of firewood or mulch if this is requested, ensuring that the tree is put to good use.

Stump Removal Service

Many customers also choose All Clear's stump removal service as well, a professional service that can be quite laborious and require specialized equipment to properly execute. Root systems of large trees can be very large, snaking deep into the soil and buckling sidewalks. All Clear's Arborists have years of experience with tackling these root systems, and can ensure they do not come back to haunt the property owner.

Proper tree maintenance is also very beneficial to property owners that care about the beauty of their yard's landscaping. All Clear Tree Service La Mesa Arborists can create a "tree maintenance program" for the homeowner which ensures that their trees are always well trimmed, disease free and healthy.

Land And Brush Clearing

East San Diego County does feature a high number of larger properties, many of which can have large amounts of "out of control" brush and plants. Keeping properties relatively clear of brush and native plants is

a major issue for residents, as the area is highly susceptible to year-round occurrences of wildfire.

An additional reason for considering brush removal is that many insurance companies require that a homeowner's property maintain a 50 foot clearance around structures in order to qualify to be insured.

No matter the need, customers in La Mesa, El Cajon, Spring Valley, Lemon Grove and Santee should feel free to check out All Clear Tree Service La Mesa for all of their Arborist services. Free estimates are always available.
