

Roofing Contractor Expands Services into St Charles, MO

October 16, 2018

October 16, 2018 -
The residential and commercial roofing company is expanding services across Missouri into three new cities. The new office is conveniently located to accommodate customers in St Charles, between the hours of 6 a.m. and 5 p.m, from Monday through Friday. The residential and commercial roofers have brought the same quality, expertise and professionalism that customers have known for over 15 years in the other cities they serve in Missouri.

As their roofing company continues to grow, they needed to expand to a new location to help facilitate this growth. At Xpert Group Contracting has made the commitment to have an office in a location to best serve their roofing customers. Their new location in St Charles has received great feedback from customers who appreciate the convenience of having a local roofing service company near their homes. The new location also provides additional space for future hiring in Missouri.

They?re available by appointment only, when a customer calls the local roofing company with a question or

problem, one of our customer service staff members will immediately take their call, schedule an appointment, or help to address their issue.

One way to check and see if the roofing contractor is real and local, is do a search on Google and see if the suspect company has a GMB listing (Google My Business page) and is local in the area. Google requires that a local business be verified by its mailing address and phone number before it is allowed to be listed as a local business in the search engine. Any excuse for not having a Google Business Page is a red flag, as it is free. Another check used is by the BBB locally.

When trying to find the best roofing material for residential home, most are not alone. The roofing estimate is an important step in getting a roof installed, and the right roofing material can help ensure longevity and avoid costly repairs. That is why they are happy to give customers the opportunity to explore the roofing material options in more detail, so that they can make the best decision for their property.

Xpert Group Contracting, they do the following services: asphalt shingle roofing, metal roofing, roof repairs, roof replacement, tile roofing, commercial 3 ply build up, and torch down.

The amount of people looking to see the different roofing contractor options available in Fulton is growing. Xpert?s Rep can go over many of the roofing options and products their team can install. If seeking to schedule a free inspection or estimate, call Xpert Group Contracting ahead of time to schedule an appointment, and they will be sure to have it on hand.

Xpert Group Contracting is also located in the cities of Columbia, Troy, O'Fallon and Fulton.
