

Digital Capital Advisors Now Offering Dumpster Rental Services In New Jersey

July 03, 2015

July 03, 2015 - PRESSADVANTAGE -

Grand Sanitation is now introducing their dumpster rental services to New Jersey. The service is available in areas such as Hunterdon, Middlesex, Monmouth, Somerset, and Union Counties. Although the company has recognized that there may be some competition for this business within the state, they believe that their prices and services will be superior as they are a direct renter, rather than a broker. More information on the areas being serviced as well as the services themselves can be viewed through the company's website at www.grandsanitation.com.

The new dumpster rental services will come with a trucking and disposal fee, varying from region to region, all of which are listed online at www.grandsanitation.com/dumpster-rental. Each dumpster can be rented with the option to customize style and size depending on the unit being served. Grand Sanitation is providing these services to residential and commercial locations in the hopes of better maintaining waste control and sanitation in all areas of the city, which means that one dumpster may work in a home location, but not fit the standards of a large commercial property. The company has said the following regarding these options: "Grand Sanitation Service provides roll-off service for industrial, commercial or residential homeowner needs. Choose from stationary/self-contained compactors, on call open top contractor service, and home owner mini

dumpster for clean-up jobs. Options include dumpsters from 10-40 yd."

Grand Sanitation is also inviting those interested in learning more about the new services to visit them through social media at www.facebook.com/pages/Grand-Sanitation-Service/211836775880. Their Facebook account provides photos, videos, interesting articles, promotions, and more for customers and community residents who are curious about Grand Sanitation. In the future, this will also be a good page to visit for those seeking testimonials or reviews from previous and current clients who have been satisfied by what the company is offering.

Along with their newest rental services, Grand Sanitation is still providing continued support to residential, commercial, and industrial customers for daily trash removal and recycling services. They offer weekly and daily services, front or rear loading containers, and promise reliable service. Unlike competitors, Grand Sanitation also offers their services in hard to reach areas such as alleys, and provides pickup from retail offices, restaurants, apartments, houses, and warehouses. They have begun to build a reputation due to their high regard for eco-friendly practices, and have said the following about their own recycling program: "With Grand you can care for the planet while you care for your home or office. We provide single stream or commingled recycle service on daily or weekly schedules. Take advantage of recycling service for paper, plastic, cans and bottles. A recycling coordinator is available for free consultation."

Residential and Commercial inquiries can be made using the easy to complete forms found on the company's website. This provides Grand with the information necessary to quote a price, and guarantee service in the area requested. Those using alternative dumpster services are being asked to consider switching to Grand Sanitation to save money and obtain superior service.
