

Virginia Beach HVAC Firm Announces Opening Of New Location

October 31, 2018

October 31, 2018 -

R. A. Styron Heating & Air Conditioning, Inc. proudly announces the opening of a new location in Virginia Beach, VA. As a second generation, family owned and operated business, they have provided for the heating and air conditioning needs of local communities since being founded in 1954. Additional service locations include Norfolk, Chesapeake, Suffolk, and Portsmouth. Now, this long-established Heating & Cooling firm opens new location in Virginia Beach, VA.

R. A. Styron offers numerous HVAC services including air conditioning, furnaces, new HVAC construction, as well as preventative maintenance. They also provide plumbing services such as water heaters, water line replacement, and frozen pipe repairs, just to mention a few. A detailed listing of all the services offered by R. A. Styron is available on their website.

R. A. Styron Heating & Air Conditioning, Inc. employs a team of licensed and bonded, highly qualified technicians that not only have the expertise to handle any job, but also provide a service guarantee for every

job they do. With over 60 years of experience, providing the customer a quality and professional results is a primary focus of the company.

They also strive to keep customers informed about the latest advancements in the HVAC industry by offering news and information on the website as well as on the firm's Facebook page. There are tips about preparing a system for winter, how to avoid clogged drain lines, and whether a ductless system is better than a centralized system.

A new post in the news section of the firm's website shares possible reasons why a furnace would be blowing cold air, and what to check for before contacting a professional. For instance, customers should check the setting on the thermostat to be sure it is set on "auto" so that it cycles on and off with the temperature change. They advise that a smart thermostat that adjusts settings according to the way it is programmed can reflect in savings on the monthly energy bill.

They note that a dirty air filter can be a cause for the furnace to overheat which could be avoided or fixed by simply replacing the filter on a regular basis. If the system is blowing cold air it may be that the pilot light is out. If it doesn't relight or remain lit, it is advisable to check for dirt or debris around it that might interfere with the pilot light. Other more serious issues like those involving the thermocouple or the flame sensor are reasons to call a qualified technician for service. Customers are also reminded to check the breaker before calling a technician. Sometimes it just needs to be switched on, saving time and money.

Voted Best HVAC firm in Virginia Beach, R. A. Styron Heating & Air Conditioning, Inc. explains the many factors that customers have been able to rely on for decades. In addition to superior service, they point out that the firm carries only the most trusted, quality products and brands and they provide links to those companies' websites.

According to them, among the many factors that make R. A. Styron the most trusted HVAC & plumbing contractors in Virginia Beach, customer service, commitment, and communication rank high on the list. These qualities have not gone unnoticed by the customers who share their experiences.

In a customer review, Bonnie Laibstain says, "We have known the Styron family and used their services for over 26 years. Everyone has always been very polite, thorough, and professional. They have done many jobs over the years at our home. We use their spring/fall maintenance program to reduce problems throughout the year. They are a reliable, trustworthy, fair company." Other customer reviews can be found in the Reviews section of the website as well as on the firm's Facebook page.

R. A. Styron Heating & Air Conditioning also lists cleanliness as a contributing factor to customer satisfaction. They point out that, having respect for the customers' home or business, their teams wear protective garments and lay plastic down to assure a proper cleanup when the job is complete.

Safety is important to customers and company, alike. On the website, R. A. Styron HVAC offers assurances to customers that they abide by all licensing and insurance requirements of the state. Acknowledging that pricing is a huge aspect when selecting an HVAC contractor, the company advises that they work with customers to minimize costs by first assessing a situation, then supplying estimates with no hidden prices.
