

Naturopathic Clinic and IV Therapy Treatments In Toronto Now Under One Roof

November 09, 2018

November 09, 2018 - PRESSADVANTAGE -

Dr. Amauri Caversan of the Dr. Amauri Wellness Centre announces IV therapy treatments and naturopathic clinic are now operating under the same roof. IV therapy is a fully-customized treatment plan that offers a solution to a wide variety of conditions.

When approached about the new-age IV therapy treatments and adding them to his existing clinic, Dr. Amauri had this to say, "IV therapy is a sought-after service. Rather than visit a different clinic for IV therapy, patients can have this support in one place."

Recently, Dr. Amauri published a blog to help the community in Toronto choose an IV therapy provider. In this blog titled, "4-Point Bullet Proof Checklist in Choosing The Best IV Therapy Toronto Service Provider," Dr. Amauri reveals the most important things to consider when choosing a doctor or clinic for IV therapy. These considerations include possession of a doctoral degree, having passed the Naturopathic Physicians Licensing Examinations (NPLEX), fulfilling the state licensure requirements, being a member and having

good standing with CAND, and (of course) being licensed to practice Parenteral (IV) Therapy.

Dr. Amauri Caversan practices naturopathic medicine, which is supported by evidence-based science. At his clinic, he combines the most up-to-date treatments and cutting-edge knowledge to offer the best health solutions for his patients. He is a Board Certified Naturopathic Doctor (CCNM) and is licensed to practice both naturopathic medicine and parenteral (IV) therapy in Ontario.

Regarding Dr. Amauri Caversan, Sarina Jones gave this review on Google, "He has become like family to me and my family. He is amazing and never gives up on you. He will give you the utmost attention and honesty. He will go above and beyond to help anyone in need. You must see him for any health concerns or conditions you may have."

IV Therapy treatments offer intuitive healing for many ailments. The hydration drip, for example, includes many essential vitamins, minerals, and electrolytes. This drip will restore fluids and detoxify the body, leaving a feeling of refreshment and energy. Another option is Myer's cocktail, an energizing drip. This drip focuses on delivering vitamins and minerals that energize the body, such as B12, B5, and B6.

Other IV treatments include Neurorecovery, Neurorejuvenation, The Detoxifier, Super Virus Fighter, and Super B Shot. A popular IV drip among cancer patients is the Cancer Support drip with high dose vitamin C. This IV is designed for patients receiving the conventional medical intervention. The high dose of Vitamin C may reduce the risk of tumors and lessen the effects of chemotherapy and radiation.

Some of the most popular IV treatments are used to improve the look and appearance of hair, skin, and nails. The IV drip may improve the health, and an improved glow is simply a side-effect. These drips are Biotin, Ultimate Anti-Aging Infusion, and Glutathione Glow. If improving the cosmetic appearance isn't enough, patients can also choose the IV drip Joy Juice, which is an IV cocktail that is packed with nutrients. These nutrients may improve mood, appetite, sleep, body temperature, aggression, anxiety, and even libido.

David Allen was happy to share this review of Dr. Amauri's services, "Dr. Amauri is a personable mature naturopathic doctor who always shows concern and interest in me as I talk and chat about my life. I'll never understand how he finds those knots in my muscles, but he does. I leave his office free of stress!"

There are different types of IV drips that are individually designed for specific ailments. However, Dr. Amauri has found that many of the base vitamins and minerals in certain drips will work well for other conditions, even if they weren't originally designed to do so. Some conditions that may be improved from a nutritional IV drip include fibromyalgia, chronic fatigue syndrome, restless leg syndrome, and multiple sclerosis. Essentially, many of the IV drips will offer a base of benefits, regardless of which drip is chosen. These benefits are a hydrated body, rejuvenated cells, detoxified liver, kidneys, and lymphatic system.

IV Therapy has many advantages over traditional medicinal alternatives. Dr. Amauri considers nutritional IV therapy to be a "direct deposit" of nutrients into the system. This means that the patient will feel the benefits quickly. Additionally, there are fewer side effects. Traditional medication typically relies on a pill taken orally, which can result in stomach pains or nausea. Since IV support avoids the stomach, there is little to no risk of stomach issues as a result of the treatment.

Patients interested in trying IV therapy can search Dr. Amauri on the web, or by checking his IV therapy Toronto clinic info. Alternatively, those interested can check this recent article to know more about the benefits of glutathione iv therapy.
